## FOREST DEPARTMENT,—(BENGAL).

## NOTIFICATION.

The 3rd July 1888.—The following is published for general information in supersession of the notification, dated the 2nd February 1887, printed on page 77, Part I, of the *Calcutta Gazette* of that date:—

The Lieutenant-Governor of Bengal is pleased to direct, under section 45 of the Indian Forest Act (VII of 1878), that the river Gunduck and its tributaries, so far as they flow within his jurisdiction in the Chumparun district, or along its borders, are areas within which all unmarked wood and timber, and all wood and timber on which the marks have been obliterated or defaced by fire or otherwise, are deemed to be the property of Government, unless or until any person establishes his right and title thereto under the provisions of the said Act and the rules made under it.

The Lieutenant-Governor approves the following rules with regard to the collection of drift timber in the Gunduck river and its tributaries in the Chumparun district.

*Drift Timber Rules for the River Gunduck and its tributaries, so far as they flow in or along the boundaries of the Chumparun District, within the jurisdiction of the Lieutenant-Governor of Bengal, made under section 51 of the Indian Forest Act.*

1. *Drift timber may be salvaged by any person.*—All pieces of unmarked wood or timber, and all pieces on which marks have been obliterated or defaced by fire or otherwise, found adrift, beached, stranded, or sunk in or on the banks of the river Gunduck and its tributaries, may be salvaged by any person.

2. *Report to be made when wood or timber is salvaged.*—The salvor shall intimate the fact that he has salvaged wood or timber to the Forest Officer, or to such Police or other officer or subordinate as the Forest Officer may from time to time direct to receive such reports.

3. *Salvage fees.*—Any such person who shall have salvaged wood or timber under these rules shall be entitled to receive as salvage fees—

(a) in the case of wood or timber, the ownership of which is proved and admitted under section 47 of the Indian Forest Act—from the owner, through the Forest Officer; 50 per cent. of the value thereof, as adjudged by the Forest Officer;

(b) in the case of wood or timber that becomes vested in Government under section 48 of the Indian Forest Act—from Government, 50 per cent. of the net balance of the sale account of the said wood or timber, after deducting therefrom all expenses of transport and other charges (if any): such salvage fees to be paid after the sale has been effected.

4. *Payments required when drift timber is shown to be the property of a claimant.*—No such wood or timber shall be delivered to any claimant who (under section 47 of the Indian Forest Act) has been recognised to be the owner until, under section 50 of the said Act, he shall have paid to the Forest Officer 50 per cent. of its value as adjudged by that officer, together with such other expenses as may have been incurred in salvaging the said wood or timber. Should the recognised owner fail to make these payments within 10 days of his receiving intimation from the Forest Officer of the amount due, the property salvaged shall be dealt with (under section 48 of the Act) as unclaimed timber.

5. *Salvaged timber which may become vested in Government to be sold to the best advantage.*—All drift and stranded wood and timber salvaged under these rules, which may become vested in Government under section 48 of the Indian Forest Act, shall be sold to the best advantage after two months from the expiry of the period fixed for the disposal of claims under section 46 of the said Act.

6. *Penalty clause.*—Any person who shall infringe any of the provisions of these rules shall be punished with imprisonment which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

The Lieutenant-Governor is further pleased, under section 2 of the Indian Forest Act (VII of 1878), to vest the Collector of the Chumparun district, the Sub-divisional Officer of Betiah, and the Officer in charge of the Gorakhpur Forest Division, Oudh Circle, North-Western Provinces and Oudh, with the powers of Forest Officers for the purpose of carrying out the rules made under section 51 of the said Act for the salvaging, collection and disposal of drift and stranded wood and timber on the river Gunduck and its tributaries, so far as they flow within his jurisdiction in, or along, the borders of the Chumparun district.

For the purpose of carrying out the said rules, such subordinates as may be employed by the Officer in charge of the Gorakhpur Forest Division shall be deemed to be officers of the Forest Department in Bengal of Class III within the meaning of the notification under sections 2, 24 and 75 (a) of the Indian Forest Act, dated the 24th July 1879, published at page 777, Part I of the *Calcutta Gazette* of the 30th idem.

P. NOLAN,

*Secretary to the Govt. of Bengal.*

J. WARE EDGAR,

## NOTIFICATION.

*The 28th June 1888.*—The following revised rules, which have been framed by the Chief Presidency Magistrate for the guidance of Benches of Magistrates in the Town of Calcutta, under section 21 of Act X of 1882, and sanctioned by the Lieutenant-Governor, are published for general information:—

1. The Unpaid Presidency Magistrates shall sit in the rotation arranged by the Chief Magistrate.

2. Unpaid Presidency Magistrates shall try only such cases as may be referred to them by the Chief Magistrate.

3. Unpaid Presidency Magistrates shall ordinarily open their Courts at noon and rise at 5 p.m. on the dates fixed by the Chief Magistrate. A special Bench may, however, be convened on any other day or at any other hour by the Chief Magistrate.

4. A Bench shall ordinarily be composed of not less than three Magistrates, when they are all Unpaid Magistrates, or of two when one of them is a Stipendiary, but the Chief Magistrate may, in his discretion, permit any two Magistrates to proceed with the hearing and disposal of cases.

5. The Chief Magistrate may, should he deem it desirable, appoint any Unpaid Presidency Magistrate sitting singly to be a Court, and on business being sent to him by the Chief Magistrate, he shall dispose of the same, but not otherwise.

6. Should any Unpaid Presidency Magistrate named for attendance on a Bench fail to be present on the appointed day, the Chief Magistrate may, in his discretion, either summon another Magistrate, or direct that the Bench should proceed without the absent member.

7. The Stipendiary Magistrates shall be *ex-officio* members of Benches; the Chief Magistrate shall, if present, officiate as Chairman: in his absence, the Junior Stipendiary Magistrate shall, if sitting, officiate as Chairman. In the absence of both the Stipendiary Magistrates, the Chief Magistrate shall nominate the Chairman.

8. The Chairman shall conduct the proceedings of the Court and exercise all the functions in that behalf usually exercised by a Stipendiary Magistrate when sitting singly; he will decide upon the admissibility of evidence, and maintain order in the Court, but it shall be open to any member of the Bench to put questions to the witnesses, either direct or through the Chairman, as the latter may deem advisable, and to suggest any matter for the Chairman's consideration.

9. Every member of a Bench shall have a voice in the finding and sentence. In a Bench consisting of three members, the opinion of the majority shall prevail; when there are only two members, the Chairman shall have a casting vote.

10. The Chairman shall himself ordinarily record the evidence and judgment in cases where a record of evidence and judgment is necessary; but such duty may, with his consent, be performed by any of his colleagues, or the evidence and judgment may be taken down by the Chief Clerk at the dictation of the Chairman.

11. A Bench may hold one or more adjourned sittings, should it be necessary to do so, for the disposal of business or of part-heard cases; but it shall be open to a Bench at the close of each sitting either to refer unheard cases back to the Chief Magistrate for disposal, or to postpone them to some other day, as may be most convenient; but adjournments should be, as far as possible, *de die in diem*.

12. Any part-heard case adjourned by a Bench composed of three Magistrates may be proceeded with on the day fixed for the adjourned hearing before any two of the said Magistrates; provided always that the accused person or persons give his or their consent. All subsequent hearings of the case, where further adjournments are necessary, shall be before the same two Magistrates.

13. Any part-heard case may be sent back to the Chief Magistrate for disposal, should it appear unsuited for trial by a Bench.

14. It is the duty of the Registrar of the Court to assist the Unpaid Presidency Magistrates, as far as lies in his power, on any question of practice, &c., that may arise.

15. The Registrar shall submit to the Chief Magistrate a weekly return showing—

- (a) the names of such Unpaid Presidency Magistrates as are absent without or on insufficient notice;
- (b) the hour at which the Benches sit; and, in the event of any Bench of Magistrates taking its seat after the appointed hour, the reason thereof;
- (c) the hours at which the Benches rise, and whether their file of cases has been disposed of;
- (d) list of cases disposed of;
- (e) list of cases adjourned, and the grounds of such adjournment.

## NOTICE TO MARINERS—(No. 27.)

## INDIA—SOUTH COAST.

## CEYLON—SOUTH-EAST COAST.

*Attention called to the new editions of certain Admiralty Charts.*

The following Notice to Mariners (No. 139 of the year 1888), issued by the British Admiralty, is republished :—

The attention of Mariners is called to the new editions of Admiralty Charts Nos. 813 and 2031, giving the results of the re-survey of the south-eastern coasts of Ceylon from the Little Basses to Trincomali by the Officers of H. M. S. *Egeria*, under the command of Captain P. Aldrich, 1887.

The offshore soundings now given are of such a nature as to render navigation perfectly safe in the thickest weather, if the lead is attended to, and the ship is not allowed to come into less than 20 fathoms of water.

The disasters which have taken place from time to time on this coast, supposed to have been on dangers situated some miles from the shore, were probably due to difficulties in fixing the true position; difficulties caused by the absence of soundings, and also by the fact that some of the mountain peaks in the interior, used as landmarks, were not in their true positions on the former charts, an inaccuracy now remedied from the trigonometrical survey of Ceylon, carried out by the Surveyor-General of that Colony.

Charts Nos. 828 and 70 will be shortly corrected for this new information.

*Note.*—Mariners navigating on the coast of Ceylon should consult the *Bay of Bengal Pilot*, 1887, pages 378—390, wherein is contained a monthly statement of Currents and Winds on the coasts of Ceylon, as experienced in 100 voyages round that island by Mr. Thomas Robson, Commander of the Colonial Government Steamer *Serendib*, during the five years, July 1881 to September 1886.

BOMBAY COAST.

*Temporary removal of certain Buoys on the South Coast.*

THE Director of the Indian Marine, Bombay, has intimated that the following Buoys on the South Coast were removed for the Monsoon on the dates noted against each:—

The Alibag Buoy	...	...	16th May 1888.
The Aujanvel Buoy	...	...	Ditto.
The Bankot Buoys (inner and outer)	...	...	18th May 1888.
The Malwan Buoy (outer)	...	...	Ditto.
The Johnstone Castle Buoy	...	...	19th May 1888.
The Ambulgad Buoy	...	...	30th ditto.
The S. W. or Elephant Island Buoy	...	...	12th June 1888.

## NOTICE TO MARINERS—(No. 25).

BAY OF BENGAL.

ANDAMAN ISLANDS.

*Depth of water on the three Coral Banks off the West Coast.*

THE following information has been received from Commander Alfred Carpenter, R. N., and is the result of a late Survey by H. M. I. M. S. *Investigator*, variation 2° E. See Admiralty Charts 825, 514, 70, 830; also Bay of Bengal Pilot, 1887:—

*The Coral Banks*—The three large banks off the west coast of the Andaman Islands are composed of dead Coral and Sand. On West Coral Bank, the northern one, the least depth is 6 fathoms near the centre; on Middle Coral Bank the least depth is 23 feet rock where the rocky strata crops up through the Sand and Coral; also near the centre of the bank; and on South Coral Bank the least water is 6 fathoms.

The banks are safe to cross in fine weather; the water is very clear and looks much shoaler than it really is.

## PORT BLAIR.

*Northern Red Buoy has been moved one cable west of its old position.*

The northern red buoy limiting the reef off the Port Officer's Jetty has been moved one cable west of its old position, and now lies 4 cables N. N.-W.  $\frac{1}{4}$  W. of the wooden pier end.

## BURMA COAST.

KYOUK-PHYOU HARBOUR—ARRACAN.

*Two dangerous shoals, a mile west of Saddle Island.*

From comparison of old charts, and by information lately gathered, there appear to be two dangerous shoals which break in heavy weather a full mile west of Saddle Island. H. M. I. M. S. *Investigator* struck shoal water 4 $\frac{1}{4}$  fathoms, hereabouts in 1885, as she was leaving Kyouk-Phyou, after finishing the survey of the actual harbour. Vessels should not pass eastward of the Irrawaddy shoal.

BASSEIN RIVER—GULF OF MARTABAN.

The Port Officer of Bassein reports as follows:—

A tripod beacon, red, with white cage, 16 feet above high-water, has been placed on the Wolf Rocks near the entrance of the river. It should not be approached from the eastward within 3 cables.

The Long Sand is now an island with trees on it.

The channel north of Ridge Shoal has closed, except for very small vessels. The two ends of this shoal are marked by red buoys.

Pariah Rock has been marked by a conical red buoy.

The Panmawaddi Flats extend right across the river, and there is only 3 fathoms water over the deepest part at low-water.

A tripod beacon has been erected on Cockatoo Rocks to act as a tide-gauge showing the water on the flats.

The Elbow Shoal is now a middle ground.

Its western edge is marked with a conical black buoy.

See Admiralty Charts 821, 831, 834; variation 3°E.

ARABIAN SEA.

MALABAR COAST.

*Regarding Jali Kund or Hog Island, Dart Rock, and Hawkin's Reef.*

THE following information has been received from Commander Alfred Carpenter, R.N., in charge of the Marine Survey of India:—

*Jali Kund or Hog Island* is shown on the present Admiralty Chart 744 one mile west of its true position with regard to Pigeon Island and the neighbouring peaks.

*Dart Rock*, the position of which depended on Hog Island, has been lately examined by Her Majesty's Indian Marine Steamer *Investigator* and found to be one mile nearer the shore than formerly stated. It lies with the following bearings and distances:—

Modeshwar Point	...	...	E by N 2 miles.
Hog Island	...	...	S S E $5\frac{1}{2}$ miles.
Pigeon Island	...	...	S W by W $\frac{1}{4}$ W $8\frac{1}{10}$ miles.

Depths of 6 to  $6\frac{1}{2}$  fathoms are found round it.

*Hawkin's Reef* is the extension of a rocky patch a mile north of Modeshwar Point. From the extreme of the patch Modeshwar Point bears S E  $\frac{1}{2}$  S distant  $1\frac{1}{10}$  miles. It can be cleared by keeping Hog Island open to westward of the largest rocky islet S W of Modeshwar.

All bearings are magnetic; variation nil; see Admiralty Charts 744, 827, 2,737.

## NOTICE BY THE ACCOUNTANT-GENERAL, BENGAL.

### SUPPLY BILLS.

NOTICE is hereby given that supply bills for sums of Rs. 500 and above in even rupees are usually obtainable on the treasuries named below at the rates of premium shewn.

Any person desiring to obtain a supply bill should send to the Bank of Bengal, Calcutta, a written application containing the following information—(1) his own name and address; (2) the name of the person to whom payment is to be made; (3) the treasury on which the bill is to be granted; and (4) the amount for which the bill is to be granted. With this application the cost of the bill (the amount plus the premium) should be paid into the Bank. If payment by telegram is desired (but this is admissible only in cases in which the name of the payee has been previously registered in the Accountant-General's office), the fact should be stated in the application, and an additional rupee paid with the cost.

The Bank of Bengal will, if the amount is available at the treasury named, receive the money tendered, and grant a receipt, returning the application therewith. The receipt and the application should then be sent to the Accountant-General's office, by which the bill will be granted.

The Bank of Bengal will be advised by the Accountant-General on the 1st and 16th of each month of the amounts available at the several treasuries, and will receive the amounts tendered by the first comers till those amounts are exhausted.

If the Bank refuses to receive any sum tendered owing to the amount not being available at the treasury, the application will be retained by the Bank and forwarded by it to the Accountant-General, who will advise the Bank and the applicant if the amount can be made available.

WEDNESDAY, JULY 4, 1888.

PART IB.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

MUNICIPAL AND LOCAL.

NOTIFICATION.

*The 1st July 1888.*—It is hereby notified for general information that the Lieutenant-Governor has been pleased to make the following additional rules under clause (i), section 138 of the Bengal Local Self-Government Act III (B.C.) of 1885, in supersession of rule 3 of the rules made under clauses (i) and (r) of the said section :—

PART IX A.

DISTRICT ENGINEER'S ACCOUNTS.

1. As the District Engineer is always located at the station where the District Board's office is situated, it is unnecessary for him to have a separate cash chest, and consequently it is not necessary for him to keep a separate disburser's cash-book, or to render disburser's accounts. His duties in respect to payment will, as far as possible, be confined to passing certificates and bills as correct, in order that they may be presented for payment, at the District Board's office, to the persons to whom money is actually due.

2. An imprest may be granted by the District Board to the District Engineer of such amount as the Board may from time to time fix, provided that it shall in no case exceed Rs. 1,000.

3. Imprest cash-books shall be kept in Form No. 1. If necessary, the District Engineer may give a sub-imprest to any subordinate recouping this from his own imprest.

4. Disbursements by the District Engineer and his subordinates shall as a rule be confined to payments not exceeding Rs 20. All cash payments by the District Engineer and his subordinates shall be met from the imprest.

5. Any miscellaneous receipts, such as the sale proceeds of materials or produce, fines or refunds, shall be at once remitted to the Treasury. Such remittances shall be accompanied by a challan (Form No. 2) in triplicate bearing the initials of the remitter. The original challan will be retained by the Treasury Officer, and the others will be returned duly receipted to the District Engineer, who will forward the duplicate to the District Board's Office, retain-

7. If daily labour is employed, muster-rolls will be kept and filed in the District Engineer's Office, copies being retained by the subordinate in charge of the work. Sircars, peons, chowkidars, and other petty establishment specially employed for particular works, though charged as daily labourers, will be paid monthly on acquittance rolls.

8. All materials purchased will be vouched by bills or purchase lists (Forms Nos. 5 and 6).

9. The expenditure on each work will be brought together in a day-book (Form No. 7). The day-book will show the expenditure on the work, the quantity of work done, and the rate of work on each item. The expenditure will be posted from details contained in the vouchers as passed by the District Engineer.

10. Duly authorised establishment charges will be brought forward in monthly bills, which will, when practicable, be paid directly from the District Board's Office, proper receipts or acquittance rolls (Form No. 8) being taken from the recipients.

11. There is no such suspense head as "Stock" provided for in the District Fund accounts, and the manufacture and keeping of "Stock" must therefore be avoided whenever it is possible to purchase good material as it is required. Materials required for any work will be charged as "material at site" against the estimate for the work. In exceptional cases, if material cannot be charged as "at site," the value must be charged in the account of "advances," a sub-head being opened for each description of material.

12. Road metal will be accounted for in Form No. 9, further details, when necessary, being shown in Forms Nos. 10 and 11, which will be kept up in the District Engineer's office.

13. Measurement books (Form No. 12) and note-books will be kept by the District Engineer and his subordinates. As the measurement book is the basis of all accounts of quantities, whether of work done by piece-work, petty contract, or contract, the entries therein must be carefully made. From the measurement book all quantities must be clearly traceable into the accounts, and it must show clearly the progressive measurement, i.e. the total quantities executed up to date on account of each work. The measurement book will, as a rule, accompany the subdivisional officer's bills, and it must be carefully compared with the latter, and also with the details in the sanctioned estimate. Any differences due to errors, excess quantities, or unauthorised items of works, must be at once enquired into, and the District Engineer will initial the measurement book in token of its having been checked and examined up to date, and that it is a complete record of each kind of work done, for which certificates have been granted.

14. When note or measurement books are issued, the name of the subordinate to whom issued and the date of issue will be noted on the book and attested by the signature of the District Engineer. A list of all books issued will be kept in the District Engineer's office in view to their being promptly called in and filed when done with.

15. The documents and accounts to be submitted by the District Engineer to the District Board's office will be as below detailed:—

(a) Duplicate of imprest cash-book, with vouchers, submitted from time to time, as recoupment is required, or at not longer intervals than once a month even if the imprest is not fully exhausted, in order that the disbursers' payments may be brought into the accounts of the month during which they have been made.

(b) Certificates or bills for work executed or materials supplied after being duly checked and certified as correct.

(c) Bills for the salaries of all establishments duly certified as correct.

(d) A day-book for each work and repair in progress during the month.

(e) A schedule or list of the day-books showing the amount of each.

These will be compiled by an Accountant in the District Engineer's

will be returned to the payee for presentation at the District Board's office for payment, the certified copy being sent by the Engineer direct to the District Board's office by way of advice. After payment, the original will be filed in the District Board's office as a voucher for the payment, and the certified copy will be returned receipted to the District Engineer for his guidance in respect to further certificates, but no payment will be made on these bills and certificates unless supported by an acknowledgment by the officer or subordinate concerned that the work has been efficiently done, or the supplies received, as the case may be.

17. The books to be kept in the District Engineer's office, besides the imprest cash-book, will be—

Register of bills passed	(Form No. 13).
Register of works	( „ „ 14).
Register of tools and plant	( „ „ 15).
Register of road metal	( „ „ 16).
Account of advances	( „ „ 17).
Account of deposits	( „ „ 18).

18. In the register of bills passed will be entered all bills and certificates received in the office.

19. The register of works is the next most important record to the cash-book, and care must be taken that it is posted with perfect accuracy, and that the entries for each work are strictly in accordance with the sanctioned estimate. In addition to entering the item of work, each sub-head in the abstract estimate will be numbered, and the corresponding numbers entered in the register: thus—No. 1, excavation; No. 2, earthwork; No. 3, soling, &c.

When in case of emergency or to prevent loss or damage expenditure is incurred on items of work for which provision has not been made in the sanctioned estimate for the work, the amount will be separately shown in the work register, and not charged off against any other sub-head on which there may be a saving, and subsequent sanction must be applied for without any delay.

In the case of original works and repairs, no item of estimate under Rs. 200 will be separately detailed in the register of works, and no work or repair estimated to cost less than Rs. 2,500 will be accounted for by sub-heads, except in cases where the District Engineer may desire it.

When a work is completed, a double line in red ink will be ruled below the last entry, and the following note made:—"Work completed and completion report forwarded to the Chairman with No. dated .."

20. The half-yearly registers for tools and plant, and for road metal will be kept in Forms Nos. 15 and 16 respectively; the expenditure on tools and plant will be entered in the register (Form No. 14) in the same manner as works and repairs. Each item, whatever may be the amount, must be shown in detail, and at the end of every half-year account will be taken by a responsible officer, who shall certify the fact in the body of the register, any difference in balance at the end of the half-year between the figures of the columns "As per this return" and "Actual as counted" being fully explained.

21. In the District Fund accounts all advances for works will be charged to the separate suspense account of "Advances," which is credited with the value of work done, supplies received, or labour performed, as the case may be.

22. All advances to contractors and others shall be made from the District Board's office, and all deposits shall be paid direct into that office, but in special cases the Board may authorise the District Engineer to make such petty advances, within prescribed limits, as may be considered necessary. The accounts of advances and deposits to be kept in the District Engineer's office will therefore be but memoranda for the guidance of the District Engineer in issuing certificates for payment. The accounts shall be kept in Forms Nos. 17 and 18, a separate folio being opened for each, and shall be

1. This form will be used by vendors for materials supplied by them.

2. Dealers should be encouraged to send in their bills in this form, and be supplied with printed forms for the purpose.

3. Purchases of materials are charged either to Tools and Plant or to specific works, and it will be necessary to obtain a separate bill for each of these classes of articles when one dealer supplies all.

4. The purchases for each particular work will be collected and accounted for in the day-book of that work.

5. In making payments for materials, care should be taken that the Sub-divisional Officer or his assistant has seen actual delivery of the stores (see col. 9 in the form). An instance occurred in which a contractor received payment for a large quantity of coal deposited at railway station; the contractor failed to pay the coal company and absconded; the coal company claimed the coal and maintained their position, as the coal had not been duly delivered into possession of Government.

1. This day-book is intended for works which are mainly carried out by several contractors or petty contractors, and to a small extent by daily labor. It is written up from day to day from the bills and vouchers on which payments are made, the few charges for daily labor being supported by daily reports or muster rolls. It shows:—

1st.—The cash charges to the work.

2nd.—The materials actually expended.

3rd.—An abstract of the progress and outturn on each sub-head of the work.

4th.—The amounts due on account of the work.

2. The particulars of the progress and the quantities of materials received and issued are obtained from a supplement furnished at the close of the month by the officer in charge of the work, the rates and values of the materials entered in this document, being filled in in the District Engineer's office.

3. It is required that this day-book shall be posted up daily, and that the full quantity of work measured, and materials received, whether paid for or not, shall be shown in the column of "Charges," the arrears unpaid at the end of the month being deducted at foot.

4. When daily labor is employed the number of workmen employed should be shown in another supplement which should accompany the Day-book.

When this is the case, the Day-book will be written up in the office of the District Engineer or Sub-divisional Officer from information given by the superintendents of the work in the daily report form, or from their note books.

2. In this way the labour and materials employed on each sub-head will be detailed day by day, and at the close of the month the abstracts in Parts II, III, IV and V will be made in the District Engineer's office from the information given in Part I, the previous Day-book and the Cash and Measurement books.

3. It is to be noted that the entries in Part I are independent of the fact of payment having been made or not, the difference between the full value of the work and the payments made on account of it is recorded in Part III, where full particulars of the arrears should be given. return is kept as a record of the disposal, mile by mile, of metal collected for consolidation, being posted from the in Form No. 10. This form will not be required in when the contract is let in a lump sum for supplying metal and laying it down also.

In dealing with road metal it is absolutely essential to keep a numerical account of each mile separate. The metal should not be transported from one place to another, but must be on the spot where it is originally deposited; and when metal is being collected on estimate, it is essential for the District Engineer to check that the mile in which the metal is being collected should be specified; otherwise it is impossible to ascertain that the metal is being provided within the rate allowed on estimate.

A very important and large part of the business of a District Engineer of a district consisting of finished roads is to buy and lay down metal, and his attention must therefore, be properly very much directed to watching and recording the results of those two operations.

## Register of Works.

1. The Register of Works is the District Engineer's permanent and collective record of work done. The form has columns for quantity and cost of each head or sub-head of work done, and the last column gives the total cost. The first line shows in red ink the estimated work and outlay as per "Abstract of estimate." Under this will be entered, month by month, from the day-books the actual expenditure incurred during the month, and the total of work done and the total expenditure up to the end of each month. The entries of quantity will be taken from the "Progress" recorded on the Day-books, and those of cost from the "Summary of charges."

2. The Register of Works should contain a record of every original work or repair estimated to cost more than Rs. 200, showing the expenditure month by month compared with the estimate, and, in the case of works estimated to cost over Rs. 2,500, with the sub-heads of the estimate.

3. The Register will be supplied with an index which should be sub-divided under the departmental heads and neatly kept for ready reference. The utmost punctuality should be observed in posting this Register to date, i.e., the posting of the Register should be complete when the monthly accounts are submitted.

4. In the case of original works, the amount of appropriation for the year should be noted in the Register at the top of the page after the authority for the work, and any additions and reductions made during the year should also be noted in the same place.

5. When "supplementary" estimates are sanctioned, the items of sub-heads should be entered below those of the original estimate, and both totalled.

6. When it is found necessary to have a "revised" estimate, the Register of the "original" estimate should be closed, and the "revised" estimate entered on a fresh page, a reference to the page on which the original estimate is to be found being entered.

7. When necessary, extra columns should be opened for "fines from contractors, &c."

8. The Register of each work on which there has been expenditure during the month should be initialled by the District Engineer in the column (15) set apart for the purpose in token of his having examined the entries and found them correct.

## Note.

## District Engineer's Form No. 17

The account of advances which should be kept in the District Engineer's office will be kept in this form.

All advances for works will be charged to the separate expense account of "Advances" which is credited with the value of work done, supplies received or labour performed, as the case may be.

All advances to contractors and others shall be made on the District Board's office. Only in special cases the Board may authorize the District Engineer to make such petty advances within prescribed limits, as may be considered necessary.

The account of advances to be kept in the District Engineer's office will therefore be but a memorandum for the guidance of the District Engineer in issuing certificates for payment. It should be balanced every month. When materials procured cannot be charged as "Materials at site" against the estimate for any work, the value should be charged in the account of "Advances," a sub-head being opened for each description of material.

### LAND SALE NOTICES.

NOTICE is hereby given that the undermentioned plots of land which are no longer required by Government for the purpose for which they were acquired will be put up to auction at the Shahabad Collectorate, on the 4th of August 1888, and will be sold to the highest bidders on the conditions specified below:—

- On the termination of the sale the auction purchaser will be required to deposit a sum equal to one-fourth of the purchase money, failing which the land will be resold immediately.
- Within a period of 30 days from the date of sale, the auction purchaser must pay the entire amount due from him on account of the sale; in the event of his failing to pay in the money within the prescribed time, the deposit of one-fourth money will be forfeited by him and the land resold.
- If the price obtained by the second sale falls short of that offered in the original sale, the first auction purchaser will be required to make good the difference.—

Notice.

**T**HE following draft of rules, which the District Board of Backergunge has framed under section 32 of the Bengal Local Self-Government Act III (B.U.) of 1885, is published for general information under section 143 of the Act, and notice is hereby given that they will be taken into consideration on or after the 28th day of July 1888, when any objections or suggestions which may be made by any person and received before that date will also be considered.

Backergunge, District Board's Office, the 22nd June 1888.

H. SAVAGE, Chairman.

CLAUSE (a).

*Meetings.*

**Rule 1.**—If the Chairman is temporarily absent from his duties, or if the office of Chairman is temporarily vacant, the duties of the Chairman under these rules shall be performed by the Vice-Chairman.

**Rule 2.**—Meetings shall be either ordinary or special.

**Rule 3.**—An ordinary meeting of the District Board shall be held on the last Saturday of every month. Provided that, if the last Saturday of any month falls on a gazetted holiday, or if for any other reason it is deemed inconvenient, the Chairman may fix another day for the ordinary meeting of the Board.

**Rule 4.**—A special meeting of the District Board may be called at any time by the Chairman. The Chairman shall be bound to call a special meeting on a requisition signed by one-fourth of the total number of members.

**Rule 5.**—The subjects referred to in rule 65 of Part IV of the General Rules, and section 29 of the Act, shall be dealt with at special meetings only.

**Rule 6.**—All other subjects which come within the province of the District Board may be dealt with at either ordinary or special meetings.

**Rule 7.**—Meeting shall be held at the office of the District Board, or at such place as the Chairman may from time to time determine on sufficient reason being recorded by him.

**Rule 8.**—The notice under rule 67 of the General Rules shall be sent by post or by such other method as may be convenient. Provided that if a local newspaper be published at the head-quarters of the District Board, the Board, by a resolution duly passed, may decide that the publication of such notice in the newspaper in question shall be sufficient.

**Rule 9.**—Notices of motions accompanied by verbatim drafts must be sent to the Chairman in time to be included in the list of business for the next meeting. Notices received too late shall be inserted in the list of business of the next succeeding meeting.

**Rule 10.**—A notice-book shall be kept by the head clerk of the Board, in which all notices of motions shall be entered. All such notices shall be dated and numbered as received.

ADJOURNED MEETINGS.

**Rule 11.**—An adjourned meeting is not competent to transact any business save that which the original meeting left unfinished.

**Rule 12.**—An adjourned meeting, being merely a continuation of the original meeting, does not require any fresh notice.

CONDUCT OF PROCEEDINGS AT MEETINGS, &c.

CLAUSE (b).

*Order of business.*

**Rule 13.**—At ordinary meetings the business shall be conducted in the following order:—

(a) The minutes of the last ordinary meeting, and of any special meeting held since, shall be read.

(b) Business postponed from the last ordinary meeting shall be considered.

(c) A progress report of works shall be laid before the Board.

(d) Letters and reports of Committees shall be read, and accounts and statements shall be considered and passed.

(e) Motion of which due notice has been given to be discussed.

(f) Any other business which may be brought forward, provided that the majority of the members present consent.

**Rule 14.**—At a special meeting only the business for which the meeting was called shall be considered.

**Rule 15.**—In the event of any objection being raised to the manner in which any resolution has been recorded the Chairman shall decide the question after reference to the original draft of the resolution, and if he finds the minute to be inaccurate, shall make the necessary correction in the minute-book.

**Rule 16.**—Unless by permission of the majority of the meeting, all subjects shall be discussed in the order in which they appear in the notice paper.

*Of motions and amendments.*

**Rule 17.**—Every motion and amendment duly moved must be seconded, and until seconded no debate thereon can take place.

**Rule 18.**—Every amendment shall be so worded as to be capable of making an intelligible sentence, either alone or in its proper place, in an original motion, as the case may be; provided that no amendment can merely negative the original motion.

**Rule 19.**—The President of the meeting may, for reasons to be recorded in writing and entered in the minutes of the proceedings—

(a) rule that a motion or amendment is illegal or out of order, and

(b) make such alterations in a motion or amendment as shall in his opinion render it legal and in order;

and may in case (a) refuse to put the motion or amendment to the meeting unless and until the proposer and seconder accept the alterations so made, and the decision of the President shall be final.

**Rule 20.**—After a motion has been moved and seconded, an amendment may be moved at any stage of the debate thereon.

**Rule 21.**—On the discussion being concluded, in the event of several amendments having been proposed, the President shall put the last amendment to the vote first; if it is negatived, he shall put the last preceding amendment; and lastly the first amendment; and if all the amendments are lost, the original proposition shall be put to the vote.

**Rule 22.**—When a motion or an amendment has been put from the chair, and been declared by the President to be duly carried, no further proposals for amending the motion or amendment can be entertained.

•  
*Of the right to speak.*

**Rule 23.**—Every member shall ordinarily stand when addressing the meeting, provided that the Chairman may for any reason permit any member to sit while so doing.

**Rule 24.**—The member who first rises to address the meeting, shall be entitled to be heard first, and should more

**Rule 25.**—Any member shall be at liberty to call the attention of the President to a point of order, even when a member is speaking. On a point of order being raised, the member addressing the meeting shall resume his seat until the question has been decided by the President. After the decision of the President, the same point of order cannot be raised again. Except as provided by this rule, no member shall interrupt a speaker in possession of the meeting.

**Rule 26.**—Except as provided in the last preceding rule, no member shall speak except to move or second a motion or amendment, or to support or oppose a motion or amendment which has been duly moved and seconded.

**Rule 27.**—A speaker who has exhausted his right to speak on an original motion, may speak on any amendment being moved.

**Rule 28.**—The mover of a motion or amendment shall in all cases have a right of reply, but otherwise no member shall speak more than once on the same motion or amendment, unless in explanation of some part of his original speech.

#### *Miscellaneous.*

**Rule 29.**—Unless not less than one-half of the members of the Board consent by signing a requisition, no subject once finally disposed of can be reconsidered within six months.

**Rule 30.**—For the purpose of taking into consideration business involving many details, the meeting may resolve itself into a Committee of the whole body. When this has been determined on, the rule prohibiting any person from speaking more than once on the same question shall be deemed suspended until the meeting resumes.

**Rule 31.**—When a motion or amendment is put to the vote, the President shall, if the mover or seconder so desire, record against it, first, names of members voting for it, and then the names of those voting against it. If the mover or seconder do not desire the names to be recorded, it will be sufficient to record the number of members for and against the motion.

**Rule 32.**—Voting by proxy is prohibited; and no member may vote upon any motion or amendment unless he be present in person at the time when it is put to the vote.

**Rule 33.**—The minutes shall, if the mover or seconder so desire, contain a brief abstract of the discussion preceding each resolution.

#### *Of protests or dissents.*

**Rule 34.**—Protests must be limited to a concise and definite statement of the motives which prompted the votes of members who voted in the minority on a given question.

**Rule 35.**—Notice of protests must be handed to the Chairman before the conclusion of the meeting at which a resolution protested against was passed, and the protest must be handed in not later than the next succeeding meeting.

**Rule 36.**—Protests duly made shall be appended to the minutes and published in the same manner as the minutes are published.

#### *Of adjournments.*

**Rule 37.**—It shall be competent to any member to move the adjournment of the debate or of the meeting in a speech not exceeding five minutes in duration.

**Rule 38.**—When a motion for the adjournment of the meeting or of a debate is made, it shall be seconded without a speech, and put by the Chairman to the vote without debate or amendment.

**Rule 39.**—No motion for the adjournment of the meeting or of a debate shall be admissible which proposes an adjournment beyond the next ordinary meeting.

#### CLAUSE (c).

##### *The custody of the common seal and the purposes for which it shall be used.*

**Rule 40.**—The common seal shall remain in the custody of the Chairman or Vice-Chairman.

**Rule 41.**—The common seal shall be affixed to the following documents:—

- (a) All deeds of sale or purchase executed by or on behalf of the District Board, and whether relating to moveable or immoveable property.
- (b) All written contracts entered into by the District Board.
- (c) The minutes of the proceedings of the Board.
- (d) The notices of meetings of the Board.
- (e) All receipts for money granted under the authority of the Board.
- (f) All notices to the public issued under the Act or the General Rules.
- (g) All plans and estimates sanctioned.

#### CLAUSE (d).

##### *Division of duties among the members of the District Board.*

**Rule 42.**—The District Board may from time to time appoint out of its members such and so many Committees, either of general or special nature, and consisting of such number of persons as they think fit for any purposes which, in the opinion of the Board, can be conveniently regulated and managed by means of such Committees, but the minutes of every such Committee shall be submitted to the Board for their approval.

**Rule 43.**—There shall be the following General Committees of the District Board, viz.—

- (1.)—The Finance Committee.
- (2.)—The Public Works, Ferries and Pounds Committee.
- (3.)—The Education Committee.
- (4.)—The Medical and Sanitary Committee.

**Rule 44.**—The duties of the Finance Committee shall be as follows:—

- (a.)—To prepare the statements, estimates, and accounts required for submission under section 47 of the Act.
- (b.)—To audit accounts under rule 69 of the General Rules, Part VIII.
- (c.)—To exercise the powers under section 55 of the Act.

**Rule 45.**—The duties of the Public Works, Ferries and Pound Committee shall be as follows:—

- (a.)—To prepare the budget estimate of receipts and expenditure in connection with Public Works, Ferries and Pounds.
- (b.)—To scrutinize and report on the progress statement and completion report of works.
- (c.)—To make settlement and regulate the proper management of ferries and pounds and arrange for their collections.

**Rule 46.**—The duties of the Education Committee shall be as follows:—

- (a.)—To consider and report on all applications for grants for Primary, Middle and other Board's schools.
- (b.)—To consider and report on matters contained in rules 118, 138, 139, 140, 151, 162 of the General Rules, Part VI.
- (c.)—To consider and report on all reports and suggestions of Sub-Inspector of Schools and the Deputy Inspector.
- (d.)—To submit the annual report under rule 167 of the General Rules.

**Rule 48.**—The members of the General Committees shall hold office for one year only, but shall be eligible for re-appointment.

**Rule 49.**—Save in the case of illness, a member of a General Committee who, without the previous permission of the District Board, shall fail to attend six consecutive meetings of such Committee, shall thereby cease to be a member, and the Committee shall apply to the Board to appoint another member in his place.

**Rule 50.**—The District Board may from time to time delegate to one or more of its members the duty of inspecting any work which is being carried out under its orders, or any institution under its control and management.

#### *Proceedings of Committees.*

**Rule 51.**—A Committee may meet and adjourn as it thinks proper.

**Rule 52.**—The quorum of a Committee shall be three members.

**Rule 53.**—A Committee shall elect a Chairman of its meetings.

**Rule 54.**—If no Chairman is elected, or if the Chairman elected is not present at the time for holding any meeting, the members present shall choose one of their number to be Chairman.

**Rule 55.**—Every question at a meeting shall be determined by a majority of the votes of the members present and voting on that question.

**Rule 56.**—In case of an equal division of votes, the Chairman shall have a second or casting vote.

#### CLAUSE (e).

##### *Powers of Chairman.*

**Rule 57.**—The Chairman of the District Board is empowered to enter into contracts relating to works and expenditure sanctioned by the Board in respect of sums or involving values not exceeding Rs. 500.

**Rule 58.**—The general superintendence and control of the establishment maintained by the District Board shall vest in, and be exercised by, the Chairman.

**Rule 59.**—Subject to any resolutions which the District Board may from time to time pass, the general powers of control and administration which are vested, or may be vested, in the Board under Part III, Chapter I of the Act, shall be exercised by the Chairman.

**Rule 60.**—Subject to any resolution which the Board may pass from time to time, the general powers of control over the proceedings of inferior local authorities, conferred on the District Board by the Act, may be exercised by the Chairman.

**Rule 61.**—The powers of the Vice-Chairman shall be such as the Chairman may by an order in writing delegate to him from time to time. Such powers may at any time be withdrawn or modified by an order similarly made: provided that nothing done by the Vice-Chairman with the express or implied consent of the Chairman shall be invalid for want of such written order.

#### CLAUSE (f).

*The person by whom receipts shall be granted for money received under the Act.*

**Rule 62.**—Receipts for money received under the Act shall be signed by the Chairman or Vice-Chairman.

#### CLAUSE (g).

*The duties, appointment, leave, suspension, and removal of the officers and servants of the Board.*

**Rule 63.**—Subject to the scale of establishment laid down by the District Board, the Chairman may appoint and dismiss all officers whose salary is less than Rs. 50 per month; provided that all dismissals must be reported to the next ordinary meeting for confirmation.

**Rule 64.**—Except as otherwise provided in the Act in the General Rules, the appointment and dismissal of officers and servants of the Board employed on a salary of Rs. 50 or upwards shall rest with the District Board.

**Rule 65.**—Except as otherwise provided in the General Rules, the Chairman may suspend any officer or servants of the Board for misconduct or incompetence; provided that the matter shall be laid before the Board for orders at their next ordinary meeting.

**Rule 66.**—Casual leave for a period not exceeding seven days at any one time, or 15 days in 12 months, and leave on medical certificate for any period not exceeding a month, may be granted by the Chairman with or without pay, and with or without the appointment of a substitute, to any officer or servant of the Board. All other leave must be granted by the Board at a meeting in accordance with the provision of the Civil Leave Code.

**Rule 67.**—Except as otherwise provided by the Act and the General Rules, all persons employed by the Board, whose services may be no longer required, shall be liable to discharge after the receipt of one month's notice, or one month's pay in lieu of notice; and no such person shall withdraw from the duties of his office without having given previous notice for the period of one month, on pain of forfeiture of a month's salary.

**Rule 68.**—The Board shall have power to inflict for neglect of duty a fine not exceeding one month's pay upon any officer or servant employed by them. This power shall be exercised by the Chairman; provided that the orders of the Chairman inflicting a fine on an officer drawing Rs. 50 per mensem or upwards shall be submitted for the confirmation of the Board at its next ordinary meeting.

**Rule 69.**—All officers and servants employed by the District Board shall, if required, furnish such security as the Board may from time to time fix.

## Notification.

THE following revised schedule of rates and charges on goods passing over the Inland Vessels' Wharves, having been approved by His Honour the Lieutenant-Governor of Bengal, is published under the provisions of section 65 of Act V (B.C.) of 1870, for general information.

By order of the Commissioners,

R. A. DONNITHORNE,  
Secretary, Port Commissioners.

The 6th June 1888.

*Schedule of Rates and Charges on the Inland Vessels' Wharves.*

A rate of two annas per ton will be levied on all goods landed from or shipped on vessels, not being seagoing vessels, using the above wharves.

Toll charge.

In addition to the foregoing charge, on all goods landed on Sundays and authorized holidays, an extra fee, amounting to 25 per cent. of the ordinary charge, will be levied.

For work done before 6 A.M. or after 6 P.M. a charge of one rupee per hour will be made in addition to the tonnage rate.

As regards the following classes of goods, the ton shall be reckoned at the respective weights and measurements hereunder appended to each class of goods, that is to say—

## NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,

*Under-Secy. to the Govt. of Bengal.*  
The 24th November 1886.

The following revised advertisement is published in substitution for that which appeared at page 1084, Part II of the Calcutta Gazette of the 9th July 1884:—

## The Indian Law Reports,

*Published under Authority.*

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st April 1888, the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

*Terms of subscription payable annually in advance.*

For the complete series, including postage, Rs. 22-8.

## FINANCIAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 25th June 1888.

## RESOLUTION.

READ—

The Annual Report of the Royal Botanic Garden, Calcutta, for the year 1887-88.

THE Report, which is one of considerable interest, shows that steady progress was made during the year. Among the plants cultivated in the garden, the largest demands were made for the *rhea* and the rain-tree (*Pithecolobium Saman*). Mahogany trees were also propagated and distributed to a great extent. Many valuable contributions from well-known botanists were made to the Herbarium during the year. Among these, the set of plants of the large natural order *Euphorbiaceae*, which were placed at the disposal of Sir Joseph Hooker, are of special value, as they have been returned by him bearing in his own handwriting the names given to them in his *Flora of British India*. The Library of the Botanic Garden also received a valuable acquisition in the transfer to it from the Royal Gardens at Kew, through the courtesy of the Director, Mr. Thiselton Dyer, of the correspondence of Dr. Wallich, extending from 1794 to 1849. The remarks made by the Superintendent in paragraph 6 of the Report, on the subject of the potato blight in Sikkim and the Khasia Hills, will be communicated to the Agricultural Department for consideration.

2. The thanks of Government are due to Dr. George King, F.R.S., for his admirable management of the garden during the year.

By order of the Lieutenant-Governor of Bengal,

COLMAN MACAULAY,

Secretary to the Government of Bengal.

No. 21G, dated Calcutta, the 15th May 1888.

From—DAVID PRAIN, Esq., M.A., M.B., Acting Superintendent, Royal Botanic Garden, Calcutta,

To—The Secretary to the Government of Bengal, Financial Department.

I HAVE the honour to submit herewith the One Hundred and First Annual Report of the Royal Botanic Garden.

## ANNUAL REPORT OF THE ROYAL BOTANIC GARDEN FOR THE YEAR 1887-88.

No great change occurred in the garden during the year. Some minor improvements were effected. One more entrance gate was provided with a suitable durwan's lodge. A new road was made from the picnic banyan to the tree-nursery. This supplies a felt want, and forms the first instalment of a road system that will open up the part of the garden occupied till 1872 by the Agri-Horticultural Society, where the shrubs and trees are now in a condition worthy of being exhibited. This system will provide an alternative entrance to the gardens from the Andul Road. A considerable portion of one of the conservatory houses was replanted. Plants of the giant water lily (*Victoria regia*) were grown in several of the garden lakes. They attracted visitors largely, and though, as is usual, nearly all perished in the cold weather, seedlings have been raised in the nurseries for the ensuing year. The season being favourable to vegetation, and the number of plants exceeding that of former years, the show of orchids was finer than ever. Five separate attempts at encroachment on the boundary of the garden have been made during the year. All of these were successfully repelled, but the frequency of the occurrence, which has taken place in spite of the existence of a well-defined series of boundary pillars, has rendered it necessary to address Government for instructions as to the best means for preventing such disputes.

extensive. This tree, a native of America, the history of whose introduction is narrated in the Garden Reports from 1878-81, is already well known in Bengal. Its timber is not valuable, but it grows rapidly, gives excellent shade, and is a useful nurse if planted with slower growing trees, to be cut down when the latter are sufficiently established. The reason for the suddenly increased demand was the statement that the rain-tree will grow on *Usar* soil, and that such soil can thus be reclaimed. *Usar* soil is barren: what is apparently meant is that the tree will grow on soil impregnated with *reh* salts. Such soil is not necessarily infertile, though without special treatment it may not afford crops except during the rains. The effects of the presence of trees may easily explain the absence of efflorescence of the *reh* salts without much improvement in the nature of the soil, nor would it be surprising to find that after a series of years of rain-tree cultivation analysis of the soil showed little change. But the cultivation of the tree is simple, and must increase the amenity of such districts; while its profuse crop of sweet pulpy pods, which cattle greedily eat, ripening as it does in April and May, supplies a valuable fodder when usually fodder is most scarce. Mahogany and other economic trees and plants were propagated and distributed to the fullest extent of which the garden is capable. A quantity of a special kind of wheat which grows in Mexico at an elevation of 11,000 feet was sent by the Secretary of State for India for experimental cultivation in Bengal. This was sent to Sikkim. It was received in March 1887, and had to be kept till October, the proper season for sowing. When it was sown unfortunately none of the seed germinated. In April 1887 a consignment of *Eragrostis Abyssinica*, or Teff, was also sent by the Secretary of State for India for experimental sowing. This grain is a native of Abyssinia at an elevation of 6,000 feet. It was sown both in Chota Nagpore and in the Sonthal Pergunnahs, but has not been successful in either locality.

3. The Herbarium was considerably enriched during the year. A set of plants of the large natural order *Euphorbiaceæ*, which had been placed at the disposal of Sir J. D. Hooker while describing that family for the *Flora of British India*, has been returned by the author. Each sheet is named by the author's own hand, its value as a type specimen being thus rendered priceless. From Kew the Director, Mr. Thiselton Dyer, C.M.G., has sent many valuable specimens; from St. Petersburg Dr. Regel and Mr. Maximowicz sent some valuable specimens which had been particularly asked for; Dr. Garcke of Berlin showed the same courtesy regarding some types which do not exist elsewhere; a beautiful set of Austro-Hungarian plants was presented by Dr. Kerner of Vienna; these, with a named collection from Mr. Medley-Wood of Natal and some critical specimens from Baron Von Müller of Melbourne, complete the extra-Asian contributions. Among Indian additions the chief place is due to the large and beautiful collection of rarities from Burma and the Shan Hills sent by General H. Collett, C.B. There were also received a fine collection from the Sikkim-Nepal frontier made by a Bhotia employed by Mr. Pantling, and an equally fine one made by a garden collector in the Chittagong Hill Tracts. Many rare things were also sent by Mr. G. Mann from Assam, Khasia, and Sylhet; Mr. J. F. Duthie of Saharanpur contributed a large number of named North-West Himalayan plants, and Major Sedgwick, R.E., a few interesting specimens from Kashmir.

4. Perhaps the most notable event of the year has been the transference of the correspondence of Dr. Wallich, Superintendent here between 1817-46, from the Library of the Royal Gardens at Kew to this Library. It constitutes 33 large volumes, and extends from 1794-1849. Some less valuable, but still highly interesting, botanical papers relating to Bengal and Assam accompanied the Wallichian correspondence. For the whole we are indebted to the good will and liberality of the distinguished Director of Kew, Mr. Thiselton Dyer, C.M.G., F.R.S.

5. The interchange and distribution department was particularly active. More plants were distributed than in any former year. This was in great measure due to the impetus given to roadside planting by the enlightened action of the Government of Bengal in the Department of Agriculture. Of plants 11,966 were received, against 27,854 given out. Of seeds 773 packets were received, against 2,714 given out. The names of all donors and recipients appear in the appendices to the report.

---

6. The Lloyd Botanic Garden at Darjeeling was under the charge of Mr. W. Kennedy. The ravages of potato-disease in Sikkim and the Khasia Hills have given a shock to the introduction of English tubers recommended in former reports. The improvement of quality noticed in 1885-86 has not continued. In 1886-87 it was found that English seed generally had turned out waxy and tasteless. The deterioration in quality, in all probability due to altered climatic conditions, has been accompanied by impaired resisting power, and they have fallen a prey to disease. Without raising any question as to the source of the disease, which those interested in introducing English seed not unnaturally declare to have previously existed in India, or at least deny having introduced with English seed, the fact remains that English tubers are particularly liable to be attacked. It seems desirable that seed from Malta, Australia, or elsewhere, where the conditions of growth differ less widely from those in the Indian hills, be imported rather than English ones.

7. The budget allotments of both Calcutta and Darjeeling gardens were spent in full. At Calcutta Rs. 784-11-6 were realised from the sale of surplus plants, or Rs. 615-4-6 below the amount estimated, and at Darjeeling garden produce brought in a revenue of Rs. 961-12—an excess of Rs. 661-12 over the amount estimated.

8. Dr. King was absent on privilege leave from 27th June to 20th September 1887, and his duties during the interval were undertaken by me in addition to my own as Curator of the Herbarium. Mr. H. Bahr was Curator of the garden during the year; Mr. W. Kennedy, as already stated, held charge of the Darjeeling garden; and Mr. William McHardy was Assistant Curator at Calcutta.

# Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government, during the week ending the 30th June 1888.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.

Western Districts.				
BURDWAN DIV.	1 Burdwan June 30, '88	1.79	Weather—cool and overcast, but not wet. Rain has since fallen at Cutwa. The early rice and jute seedlings and the rice sowings, though injured by the drought, are safe for the present. More rain wanted.	
	Culina ...	3.02		
	Cutwa ...	Nil		
	Rancegnnge ...	0.84		
	2 Bankoora „ 30, '88	3.52		
3 Birbhum „ 30, '88		3.19	Weather—seasonable. Sufficient rain last week. Sowing of rice, which was interrupted for want of rain, has been resumed. Prices continue unaltered. Weather—cool and cloudy at Sudder; hot at Rampore Hât. Sugarcane has suffered severely and irretrievably from the drought. <i>Dhan</i> seedlings have also suffered, especially in the north. Transplantation not begun. Heavy rain on 28th and 29th has done good in the Sudder, but there was hardly any in the sub-division, and much more is urgently wanted everywhere. Prices rising.	
4 Midnapur „ 30, '88		2.17	A local storm on 24th. On 28th heavy monsoon clouds and good rain. Rain again on 29th night. Some damage has been caused to the <i>aus</i> crop and to <i>amun</i> seedlings. As there was no water in the canal, even the protected area suffered. The drought prevented indigo manufacture being commenced, and all the leaves fell off the plant. The present weather is, however, very forcing.	
5 Hugli „ 30, '88		3.02	Weather—cloudy. Some damage was done by the great heat to <i>aus</i> , jute and sugarcane, but prospects have improved with the recent rain.	
	Jehanabad ...	2.26		
	Howrah July 2, '88	1.80		Weather—showery. Rain has done much good. If it continues, crops will do well.
	Oolooberia ...	1.75		
Central Districts.				
PRESIDENCY DIV.	6 24-Pergha. July 3, '88	0.37*	The monsoon set in on the 27th June, and the weather has since been showery and comparatively cool. The recent rain has improved the prospects of the crops. More rain wanted. Ploughing and sowing continue.	
	7 Nuddea June 30, '88	3.79		
	Meherpur ...	0.31	Weather—changeable and sultry. South-westerly winds prevail. In the Meherpur, Chooadanga and Ranghat sub-divisions more rain is required for early rice, which has been much damaged in Chooadanga and Meherpur.	
	Chooadanga ...	0.33		
	Ranghat ...	1.18	Weather—hot and clear till 27th afternoon, since which rains have set in. <i>Aus</i> promises well. Cultivation of <i>amun</i> in progress. More rain wanted for transplanting.	
	8 Khoolna „ 30, '88	2.18		
	9 Jessore „ 30, '88	4.83	Weather—less warm and seasonable. The rain of the 27th June has done immense good to the standing crops, but more rain is still wanted in some parts of the district.	
	Jhenidah „ 30, '88	1.03		
	Magoora ...	0.83	Weather—Beginning of the week intensely hot. Rain of the 28th afternoon cooled down temperature. Sky overcast on the 29th evening, but no rain. <i>Aus</i> and <i>amun</i> plants suffering. Rain of the 28th will do good to some extent. More rain is sadly needed.	
	Narail ...	1.75		
Bongong ...	0.75			
10 Moorshedabad „ 30, '88	1.74			
RAJSHAHY DIV.	Lalbagh ...	2.27	Weather—showery with a good deal of cloud. The showers during the week have been beneficial to the crops, but heavier rain will soon be wanted for transplantation. Jute has suffered in parts from short rainfall.	
	Kandi ...	0.86		
	Jangipur ...	1.08	Weather—cooler since the rain; cloudy. Rain is urgently wanted. Paddy, jute, and <i>til</i> are drying up. Both <i>aus</i> and <i>amun</i> appear to have suffered everywhere from want of rain. Rice sells at 22½ seers per rupee.	
	11 Dinagepur June 30, '88	2.82		
	Thakurgaon ...	3.86	Weather—cloudy with heavy showers of rain from time to time. Prospects of crops continue good. <i>Aus</i> is being reaped, and <i>kaimanta</i> transplanted.	
	12 Rajshahye „ 30, '88	0.19		
	Natore ...	0.80	Weather—hot and muggy at the beginning of the week; cooler and wet at its end. Jute, <i>aus</i> and broadcast <i>amun</i> already sown are good. Want of rain delays the sowing of <i>amun</i> for transplanting. This is most seriously felt in the south-west of the district. Price of rice stationary.	
	Nowgong ...	1.40		
	13 Rungpur „ 30, '88	4.23	Weather—hot, cloudy, and latterly rainy. Prospects of crops continue good. Rain has done much good, but more is required.

CHITTAGONG DIVN.	22 Chittagong July 3, '88	8.08	Weather—seasonable. Sowing of <i>aus</i> completed. <i>Aman</i> being sown in some places. Prospects of crops fair. Prices steady.
	23 Noakholly June 29, '88	1.35	Weather—cloudy with occasional scanty rain. Some damage to <i>aus</i> is reported from Fenny and Bogumungo. The rains seem to have set in, and a few heavy showers will remove all anxiety.
	24 Tipperah „ 28, '88	1.82	Weather—seasonable. Rain, which was much wanted, has fallen, and prospects are good all round.
	25 Chittagong Hill Tracts „ 26, '88	1.49 0.10 1.82	Weather—a heavy downfall of rain on the 25th; cloudy to-day (26th), with light showers. Sowing of paddy by plough cultivators has been retarded for want of sufficient rain.
	Hill Tipperah „ 27, '88	1.21	Weather—hot and cloudy. Lands still being prepared for <i>amss</i> paddy. Sugar-cane not doing very well.
<b>BEHAR.</b>			
PATNA DIVN.	26 Patna June 30, '88	0.11	Weather—very hot and sultry. For want of rain <i>bhadoi</i> sowings have been stopped. <i>Makai</i> and <i>cheena</i> plants of the early sowings are withering for want of moisture. Rain urgently wanted. Prices of grains are rising daily.
	27 Gya „ 30, '88	Nil 3.02	Weather—hot and cloudy. Sowing of <i>bhadoi</i> and paddy begun. More rain urgently wanted.
	28 Shahabad „ 30, '88	0.03	Weather—exceedingly hot and close, occasionally cloudy, but marked by total absence of rain. Rain is badly wanted for sowing of <i>bhadoi</i> and rice. Sugarcane promises well, being watered from canal and wells.

	30 Mozufferpur „ 30, '88	1.00	Weather—very hot in first part of week; cooler during last three days. The protracted drought has done some damage to maize, paddy and indigo, but the rain, which has fallen during the latter part of the week, has done much good to the standing crops. More rain is wanted for transplantation of paddy.
	Hajepur „ „	Nil	
	Sitamarhi „ „	0.60	Weather—exceedingly hot and sultry. Rain is urgently required for the rice, <i>bhadoi</i> and indigo crops. Agricultural operations are almost at a standstill for want of rain.
DHARWAD DIVN.	31 Sarun „ 30, '88	0.07	Weather—cloudy and rainy. Rain has benefited the standing crops. <i>Murua</i> being transplanted and <i>makai</i> coming on. More rain is needed for paddy transplantation. Indigo-mahai progressing.
	Sewan „ „	0.13	Weather—very hot and sultry; occasionally cloudy with indications of rain. Sowings stopped for want of rain. <i>Makai</i> plants and other <i>bhadoi</i> crops are withering.
	32 Champaran „ 30, '88	1.44	Weather—a little cooler. The two northern sub-divisions have since date of their reports had some good rain, which will do much good, but on high lands the <i>murua</i> , early rice and late rice seedlings have suffered much. ORISSA DIVN.	38 Cuttack June 29, '88	Nil	Weather—extremely hot and sultry, cloudy at times but no rain, causing general anxiety. Agricultural operations retarded. <i>Beali</i> and <i>sarad</i> plants are dying in many places for want of rain. Prices rising.
	39 Pooree „ 28, '88	1.14	Weather—hot. Winter rice ( <i>sarad</i> crop) has germinated in some places. Early rice ( <i>beali</i> ) is being weeded. Miscellaneous crops of the season are doing well. The Sub-divisional Officer states—“Some paddy already sown has not yet germinated. Much of the first sowings will most probably fail, representing a loss of seed grain about one maund per acre, besides labour.” Common rice 21 seers 13 chittacks per rupee in the Sudder sub-division and 19 seers 12 chittacks in the Khoorda sub-division.

CHOTA NAGPORE DIVN.	41 Hazaribagh June 29, '88	1.04	Weather—very hot and dry. Rain last night (28th). Paddy seedlings withered. Sugarcane suffering. Severe scarcity of water and pasturage. Cattle enfeebled. Rain urgently wanted.
	42 Lohardugga „ 30, '88	1.67	Weather—cloudy. Rain fell in the last three days of the week. More rain expected. Prospects of crops improving. Rain badly wanted in Palamow, where cattle are dying for want of pasture.
	43 Singhbhum „ 29, '88	0.64	Heat has been excessive. Slight rain on 28th and 29th June. The <i>dhan</i> has suffered greatly and so also the Indian corn. If rain does not fall in a day or two, the whole crop ( <i>gora</i> ) will be lost.
	44 Manbhum „ 30, '88	1.72	Weather—cloudy and cool. The late rain has done good, but more is urgently wanted for the sowing. Prices are rising.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h. 10h. 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, d drizzling rain, p passing temporary showers, t thunder, < lightning.

# SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 29TH OF JUNE 1888.

THE week under review has been a noticeable one in the meteorological history of the year, as the monsoon rains have only commenced over the greater part of the province during the latter end of the week, and they have therefore been about two weeks later than usual. At the close of the previous week the monsoon current blowing from the Bay of Bengal was being deflected towards Burma and the eastern districts generally, and Assam had been receiving heavy rain for some considerable period. The area receiving rainfall was, however, gradually extending, and moderate to heavy rain was being received in the Rungpore, Julpigoree, Cooch Behar and Darjeeling districts of North Bengal; but the greater part of the remainder of the province had been almost rainless throughout the week ending the 22nd. A slight advance of humid winds had, however, taken place on this day in the western districts, as was shown by the rapid increase in the humidity in Behar, and moderate rainfall, apparently to a great extent brought about by a series of local storms, was reported on the 23rd from all the districts of South-West Bengal, except Midnapore and Moorshedabad. On the following day the area of rainfall contracted, and except at some of the stations in East and North Bengal, rainfall was practically absent from the province, and again ordinary hot weather conditions obtained over the greater part of Bengal. On the 25th and 26th, weather conditions had not changed to any material extent, except that there were slightly more favourable indications of the probability of the monsoon drifting over Bengal; but on the 27th a rapid and important change took place. On this day it almost appeared as if there had been a decided increase in the strength of the Bombay branch of the monsoon current; pressure rose rapidly in the western and central districts, and a south-westerly wind current set in at many of the stations in the centre and north of the province; and even at Darjeeling a strong south-westerly wind, averaging 21 miles an hour, was reported. With this sudden inrush of winds considerable interaction took place, and thunderstorms became numerous in the south of the province. On about the same day also the Bay of Bengal monsoon current commenced to spread over South-East Bengal, and it has since that day steadily advanced over the whole province, and from the 27th to the 29th considerable amounts of rain have been received. In South-West and East Bengal the general rainfall commenced on the 27th, and over a large part of North Bengal it began from about the 28th, except in the districts previously mentioned, viz., Rungpore, Julpigoree, Cooch Behar and Darjeeling, where rain has been reported throughout the week. In North Behar and Ohutia Nagpur also rainfall generally commenced about the 28th; but in South Behar even on the 29th, rainfall, though fairly general, was still very partial in some districts. Finally, in Orissa rainfall was light and irregularly distributed throughout the week. The monsoon rains may therefore be said to have only broken in the province from about the 27th to the 29th, and as the usual date of commencement is from the 10th to the 15th, or, say, the 12th June, the rains have been quite a fortnight late in setting in.

In the previous week's report it was stated that the delay in the advance of the monsoon current over Bengal, so far as could be judged, was probably due to the existence of disturbed conditions off the West Pegu and Arakan coasts, and that there were also distinct indications of the continued existence of a feeble low-pressure area in that locality. With the setting in of the rains in Bengal, the whole of the indications above referred to have completely disappeared, and conditions now appear normal in the Bay. But with the disappearance of these conditions in the Bay, a feeble but distinct tendency to the formation of a low-pressure area has commenced in South and South-West Bengal. The appearance of this tendency to low pressure, and consequent cyclonic circulation of winds in South Bengal simultaneously with the disappearance of these conditions in the Bay, may be merely a coincidence, or it may be they are directly connected with each other; but perhaps the latter is more probable, though the evidence available is not sufficient to prove any distinct connection between the two, or to prove the transfer of the disturbance from the one area to the other.

**Pressure.**—For the earlier part of the week the oscillations of pressure were of little importance, but, as stated previously, a rapid rise took place on the 27th, which was coincident with the setting in of favourable conditions for the commencement of the rains. When the mean pressures of the various stations in the province from which observations have been received for a long series of years are compared with the normal for the week, the distribution of pressure is found to be very unusual. Thus pressure has been distinctly below the normal at the greater number of inland stations in the centre of the province, while to the west and east there are bands of comparatively higher pressure. At such stations as False Point, Cuttack, Saugor Island, and Hazaribagh, the mean pressure has been above the normal; and at the eastern stations, such as Dacca, Burrisal, and Chittagong, pressure has also been above it; while at Calcutta, Burdwan, and Jessore, and most of the inland stations, pressure has been very distinctly below the normal, the extreme variations being from an excess pressure of about 0.04 inch in the one case to a defect of 0.038 in the other. For the whole province these variations to a great extent neutralize one another, and the mean pressure is only in defect of the normal by three thousandths of an inch.

**Temperature.**—Owing to the almost complete absence of rainfall from the greater part of the province for the first four days of the week, temperature has again been rather

has been no less than  $10\cdot2^{\circ}$  in excess of the normal, and in South Behar the excess has been  $7\cdot9^{\circ}$ . In South-West Bengal and Orissa the excess has varied from  $4^{\circ}$  to  $5^{\circ}$ , and in East Bengal and North Behar it has equalled about  $2^{\circ}$ . For the whole province temperature for the week has been in excess of the normal by  $4\cdot6^{\circ}$ . In Assam, on the other hand, the mean temperature has been in defect by  $3\cdot2^{\circ}$ . Dehree again reports this week the very high maximum temperature of  $114^{\circ}$ , and Gya one of  $112\cdot1^{\circ}$ .

*Rainfall.*—The period of the occurrence of rainfall has been previously recorded. The falls have been heaviest in North Bengal, which averages  $5\cdot24$  inches, and has thus received a fall rather larger than the normal amount of  $4\cdot42$  inches. In East Bengal an average fall of  $3\cdot90$  inches is recorded, or almost absolutely the normal amount. In South-West Bengal a fall of  $2\cdot13$  inches is recorded, or slightly lower than the normal for the week. The next largest fall is in North Behar, which averages  $1\cdot35$  inches, or only about 50 per cent. of the amount usual at this period. In South Behar a fall of  $1\cdot04$  inches is recorded, and Chutia Nagpur has received  $1\cdot01$  inches, which amounts are about two-fifths of the normal falls; and finally, in Orissa a fall of only  $0\cdot65$  inch has been received, which is only about a fifth of the usual amount.

In North Bengal some extremely heavy falls have been received during the week, and thus at Alipore Dooar (Julpigoree district)  $23\cdot24$  inches has been received, at Dinhatpa (Cooch Behar district)  $19\cdot53$  inches, and at Fallacotta (Julpigoree district)  $17\cdot68$  inches. Contrasted with these excessive falls, Sorah and Balasore in Orissa, Tajpur and Roshera in Durbhunga, Sasseram and Arrah in Shahabad, Daudnagar in Gya, Barrh in Patna, Monghyr and Gogri in Monghyr, Bhagulpore and Kolgong in Bhagulpore, and Hosseinabad in Lohardugga, have received absolutely no rain during the week.

The general districts in which the rainfall has been very scanty during the week are Pooree, Cuttack, Balasore, South-West Midnapore, South 24-Pergunnahs, Bogra, Pubna, Rajshahye, Maldah, Dinagepore, Purneah, Mozufferpore, Durbhunga, Sarun, Shahabad, Patna, South Bhagulpore, Monghyr, and Chyebassa.

In Assam excessive rain has been received during the week. Dhubri reports the extremely large fall of  $26\cdot06$  inches, Silchar  $9\cdot47$  inches, and Sibsagar  $1\cdot83$  inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the week ending Friday, the 29th of June 1888 :—

*Limits within which Fishing Stakes are prescribed.*

CLAUSE 1 of Notice to Mariners (No. 155 of the year 1888), issued by the British Admiralty, is republished.

The Marine Department, Bombay, has given notice, dated 2nd May 1888, that fishing stakes are not allowed to be placed, in the approaches to that harbour within the following prescribed limits :—

1. Within the space bounded on the east by the western port limit defined by a line drawn from Malabar Point to Outer Light Vessel, and thence to Kundari Island ; on the north by Prongs Light-house bearing East; and on the south by Kundari Light-house bearing East.

2. Fishing stakes are not allowed to be placed within the ranges of visibility of either Prongs or Kundari Island Lights, outside the 10-fathoms line of soundings.

3. Fishing stakes are placed within the 10-fathoms line both northward and southward of the limits (Prongs Light-house bearing East, and Kundari Island Light-house bearing East) within the ranges of visibility of those lights ; and Mariners are therefore warned of the danger incurred should they come within the 10-fathoms line either northward or southward of those limits.

4. Within the port limits, the fairway to the anchorage is kept free from fishing stakes, except the line of them  $2\frac{1}{2}$  miles north-eastward of Thull shoal.

*The Storm Signals to be used on the approach of a Cyclone.*

CLAUSE (1) of Notice to Mariners (No. 152 of the year 1888), issued by the British Admiralty, is republished :—

The following information, relative to the establishment of Storm Signals at the port of Chittagong, has been received from the Harbour authorities at that place :—

The Storm Signals will only be used to give warning of the early approach of a severe cyclone, with its attendant storm-wave. They will be hoisted on the yard-arm of the flag-staff at Sudder Ghât, and on the yard-arm of the flag-staff on Jaldia Hill, on the receipt of instructions from the Meteorological Department, as follows :—

*Day Signals.*

1. A ball indicates that a severe cyclone, of which the centre is in the neighbourhood of Akyah, will probably advance towards Chittagong.

2. A drum indicates that a severe cyclone, with its attendant storm-wave, is approaching Chittagong.

*Night Signals.*

3. Three lights, placed vertically, indicate that a severe cyclone, of which the centre is in the neighbourhood of Akyah, will probably advance towards Chittagong.

## INDIA—SOUTH COAST.

## CEYLON—SOUTH-EAST COAST.

*Attention called to the new editions of certain Admiralty Charts.*

THE following Notice to Mariners (No. 139 of the year 1888), issued by the British Admiralty, is republished :—

The attention of Mariners is called to the new editions of Admiralty Charts Nos. 813 and 2031, giving the results of the re-survey of the south-eastern coasts of Ceylon from the Little Basses to Trincomali by the Officers of H. M. S. *Egeria*, under the command of Captain P. Aldrich, 1887.

The offshore soundings now given are of such a nature as to render navigation perfectly safe in the thickest weather, if the lead is attended to, and the ship is not allowed to come into less than 20 fathoms of water.

The disasters which have taken place from time to time on this coast, supposed to have been on dangers situated some miles from the shore, were probably due to difficulties in fixing the true position; difficulties caused by the absence of soundings, and also by the fact that some of the mountain peaks in the interior, used as landmarks, were not in their true positions on the former charts, an inaccuracy now remedied from the trigonometrical survey of Ceylon, carried out by the Surveyor-General of that Colony.

Charts Nos. 828 and 70 will be shortly corrected for this new information.

*Note.*—Mariners navigating on the coast of Ceylon should consult the Bay of Bengal Pilot, 1887, pages 378—390, wherein is contained a monthly statement of Currents and Winds on the coasts of Ceylon, as experienced in 100 voyages round that island by Mr. Thomas Robson, Commander of the Colonial Government Steamer *Serendib*, during the five years, July 1881 to September 1886.

**NOTICE BY THE ACCOUNTANT-GENERAL, BENGAL.**

## SUPPLY BILLS.

NOTICE is hereby given that supply bills for sums of Rs. 500 and above in even rupees are usually obtainable on the treasuries named below at the rates of premium shewn.

Any person desiring to obtain a supply bill should send to the Bank of Bengal, Calcutta, a written application containing the following information—(1) his own name and address; (2) the name of the person to whom payment is to be made; (3) the treasury on which the bill is to be granted; and (4) the amount for which the bill is to be granted. With this application the cost of the bill (the amount plus the premium) should be paid into the Bank. If payment by telegram is desired (but this is admissible only in cases in which the name of the payee has been previously registered in the Accountant-General's office), the fact should be stated in the application, and an additional rupee paid with the cost.

The Bank of Bengal will, if the amount is available at the treasury named, receive the money tendered, and grant a receipt, returning the application therewith. The receipt and the application should then be sent to the Accountant-General's office, by which the bill will be granted.

The Bank of Bengal will be advised by the Accountant-General on the 1st and 16th of each month of the amounts available at the several treasuries, and will receive the amounts tendered by the first comers till those amounts are exhausted.

If the Bank refuses to receive any sum tendered owing to the amount not being available at the treasury, the application will be retained by the Bank and forwarded by it to the Accountant-General, who will advise the Bank and the applicant if the amount can be made available.

*Names of Treasuries on which Supply Bills are usually obtainable.*

## PART I A.

### Orders and Notifications by the Government of India, &c.

[Reprinted from the "Gazette of India."]

The following orders, issued by the Government of India, in the Home Department, are published for general information.

J. WARE EDGAR,  
Chief Secy. to the Govt. of Bengal.

#### NOTIFICATIONS—PUBLIC.

Simla, the 3rd July 1888.

No. 1817.—In supersession of Home Department (Public) Resolutions No. <sup>26</sup> 953-65, dated 19th July 1883, No. <sup>81</sup> 1336-1345, dated 23rd August 1884, and No. <sup>8</sup> 101-107, dated 16th January 1885, the following Rules for the regulation of appointments to the Secretariat Clerical Service are published for general information.

*Rules for the Regulation of Appointments in the Secretariat Clerical Service of the Government of India and attached Offices.*

1. The Secretariat Clerical Service shall for the future be separated into an Upper and a Lower Division,—the former comprising all appointments the pay (or, in the case of appointments carrying progressive pay, the minimum pay) of which is Rs. 200 and upwards; the latter, all appointments (other than those of copyists, to whom these Rules do not apply) the pay of which is below that sum. No clerk will be entitled to promotion from the Lower to the Upper Division as a matter of course or otherwise than in accordance with these Rules.

2. The head of the office concerned shall have an absolute power of selection in the case of appointments of Registrars of Offices, Superintendents of Branches, Head Assistants, Personal Assistants, or appointments involving the control or supervision over divisions of an office. The mode of recruiting one-half of the remaining appointments in the Upper and two-thirds of all the appointments in the Lower Division shall be by open competition. The rest of the appointments in the Upper and Lower Divisions may be filled in accordance with Rules 12 and 13.

3. An examination of candidates for the Secretariat Clerical Service will be held at Calcutta, Allahabad, and Lahore, and at such other places as may hereafter be appointed, in January of each year. The examination at Allahabad will be confined to persons domiciled in the North-Western Provinces, Oudh, the Central Provinces, Rajputana, and Central India, and that at Lahore to persons domiciled in the Punjab and Baluchistan. The arrangements for the examinations will be made by the Board of Examiners, Fort William, who will be assisted by paid Examiners, and act in communication with the Secretary to the Government of India in the Home Department. Before the examination commences, a distinguishing number will be given by the Secretary to the Board of Examiners to each candidate with which he will mark each of his papers of answers.

4. The nature of the examination will be as follows:

*A.—For all Candidates.*

(1) Dictation and Handwriting.

This will be a preliminary test, which all candidates, whether for the Upper or Lower Division, must satisfy. The examination in these subjects will not be competitive, but

marks will be assigned for the purpose of testing proficiency. The papers of candidates will be examined as soon as possible after this examination; and the Examiners will require any candidate who fails to obtain two-third marks in each subject to withdraw from the further examination.

*B.—For Candidates for Appointments in the Upper Division.*

	Marks.
(1) English composition ... ..	100
(2) Précis writing and drafting ... ..	100
(3) Geography ... ..	50
(4) History (English and Indian) ... ..	50
(5) Elementary Mathematics [Arithmetic; Euclid, Books I to IV; Algebra, to Quadratic Equations (inclusive)] ... ..	75

*C.—For Candidates for Appointments in the Lower Division.*

	Marks.
(1) English composition ... ..	100
(2) Précis writing ... ..	100
(3) Geography ... ..	50
(4) History (English and Indian) ... ..	50
(5) Arithmetic; Euclid, 1st Book; Algebra, up to Simple Equations	50

No candidate will be credited with marks in either subject (1) or subject (2) unless he obtains at least one-fourth of the marks in the subject; nor will he be credited with marks in subject (3), subject (4), or subject (5) unless he obtains one-fifth of the marks in the subject. Any candidate obtaining less than one-fourth marks in either subject (1) or subject (2) shall be disqualified. Candidates will not be eligible for the Lower Division of the Financial Department (if with reference to Rule 18 below the Department adopts these Rules), or for the Office of the Accountant-General, Public Works Department, unless they obtain at least one-third of the full number of marks in Arithmetic.

5. Every candidate for an appointment in the Upper or Lower Division must send a written application for permission to appear at the examination to the Secretary to the Board of Examiners between the 1st and 15th days of December (inclusive).

[FORM.]

To the Secretary to the Board of Examiners,

Fort William.

SIR,

I request permission to present myself at the ensuing examination of candidates for appointments in the Upper Division of Government Clerkships. If successful, I should elect to serve in the office of the Lower. A treasury receipt for the fee of Rs. 7½ is forwarded herewith.

I am, &c.

6. The application under the last rule should be in the form given on the margin, and be accompanied by a treasury receipt for the sum of either Rs. 10 or Rs. 20, according to the division (Lower or Upper) in which the candidate may wish to appear. This sum he is required to pay into the treasury nearest his place of residence by way of examination fee. With the application must also be forwarded—

- (1) Evidence (except in the cases provided for by Rules 8 and 9) that the candidate at the date of making his application is not less than 18 and not more than 24 years of age. The date of the candidate's birth must be stated.
- (2) In case the candidate has been educated at a school in which students' good conduct registers are kept, the candidate's register for the last year of his attendance at school when a year has not elapsed since he left school. In other cases, a certificate that the candidate is of good moral character from the head of the institution in which he has last been educated, or from some respectable householder to whom he is well known in private life, and who is himself known to a District or Sub-divisional Magistrate or to the head of some Government office,—this last fact being certified by the countersignature of the officer in question.

7. The number of candidates to be selected by the Examiners for each Division will be notified in the *Gazette of India* by the Home Department on or before the 31st October. This number will be determined in communication with the heads of the offices concerned, with reference to the number of vacancies existing or estimated as likely to occur within the course of the following year (and which it is not intended to fill under the provisions of Rules 12, 13, and 14), plus a margin of 10 per cent. for casualties. One-half the number of vacancies offered will be reserved for candidates domiciled in the North-Western Provinces and Oudh, the Punjab, and the Central Provinces, Rajputana, Central India, and Baluchistan, provided that a sufficient number of duly qualified candidates to fill these appointments appear from those territories.

8. Persons who have at any time held a permanent appointment in any of the offices affected by the Resolution, but who may have lost such appointment owing to its abolition or on reduction of establishment, may present themselves for examination under these Rules, provided they are under 40 years of age.

9. Clerks who were serving in the Lower Division of an office before the date of these

clerk who enters the Lower Division after the date of these Rules will be permitted to appear at the examination for the Upper Division unless he is under 24 years of age.

10. As soon as practicable after the open competitive examinations, the Board of Examiners will report the result to the Home Department. The report will take the form of a list giving the names of selected candidates and the exact dates of their births; the distinguishing numbers of unsuccessful candidates; and the number of marks obtained by each candidate, whether successful or unsuccessful, in each subject of examination. The Home Department will then circulate a list of selected candidates to the heads of the offices concerned. Candidates will be given their choice of Departments as far as possible; and the Home Department will intimate such choice, if made, to the head of each office. The head of each Department will, however, be at liberty to offer a vacant appointment which may occur in his Department to any selected candidate remaining on the list. This offer should be made through the Home Department, which will keep each Department of the Government of India informed as the names of selected candidates are removed from the list. No candidate selected in a later year shall be offered an appointment until the offer has been made to and refused by selected candidates of an earlier year remaining on the list.

11. When an outside candidate for either Division attains the age of 25 years, or when two years have expired from the date of the entry of his name on the list, or when any candidate has refused the offer of an appointment in the Department in which he has elected to serve, or has twice refused the offer of an appointment in any other Department or Departments, his name shall immediately be removed from the list.

12. Every alternate vacancy in the Upper Division, excluding vacancies in the offices of Registrar, Superintendent, Head Assistant, Personal Assistant, or appointment involving the control or supervision over divisions of an office, and every third vacancy in the Lower Division, may be filled by the head of a Department without reference to the preceding rules.

13. Appointments made under the last preceding rules shall, if the person appointed is not in Government service, be made subject to the conditions that the person appointed—

- (a) is at the time of appointment not less than 18 and not more than 25 years of age;
- (b) can give satisfactory evidence that he possesses a minimum educational qualification equivalent to the Entrance standard of one of the Indian Universities if appointed to the Lower, and to the F. A. standard of one of the Indian Universities if appointed to the Upper Division;
- (c) must produce satisfactory evidence that he is of good moral character.

14. Any officer already in Government employment may be appointed to any vacancy such as is referred to in Rule 12 without regard to the qualifications specified in the preceding rule.

15. The heads of offices to which these Rules apply are at liberty to arrange transfers from the Upper Division of one office to that of another, or from the Lower Division of one office to that of another. The transfer of an officer from a post in an office to which the Rules apply to a vacancy in another office to which these Rules also apply shall, for the purposes of Rule 12, be held to be the filling up of a vacancy.

16. Before a person who is not already in Government service is actually employed in any office, he must produce a certificate from a Government Medical Officer of or above the rank of Surgeon to the effect that he is in good health and of a sound constitution.

17. Every candidate, whether selected by examination or nominated, who receives an appointment, will be on probation for twelve months; and if at any time during that period, or at its close, his work is not considered satisfactory by the head of the office in which he is employed, he will receive his discharge, and will have no claim to gratuity or compensation on that account. This rule will not apply to clerks selected for the Upper Division, who were previously permanent clerks in the Lower Division of the office in question, nor to clerks selected from other Government offices; but such clerks may, if found unfit for the higher grade, be relegated to their former appointments, or, so far as may be, to appointments of corresponding emoluments. To provide for such cases, arrangement should be made by which promotions in the place of the transferred clerks should be *sub. pro tem.* until the latter have passed their period of probation.

18. The above Rules will apply to the Secretariat Offices of the Government of India, except the Foreign Department and the Department of Finance and Commerce, whenever the latter fills vacancies by recruitment of officers already holding clerical appointments in any of the Account Offices subordinate to it. When the Department of Finance and Commerce does not recruit in this manner, the Rules will apply. They will also apply to the Offices of—

The Sanitary Commissioner with the Government of India,  
The Surgeon-General with the Government of India,  
The Director-General of the Post Office of India,  
The Northern India Salt Revenue Department,  
The Inspector-General of Forests,  
The Director-General of Telegraphs,  
The Accountant-General, Public Works Department,  
The Consulting Engineers for Railways,

The Superintendent of the Geological Survey,.  
 The Meteorological Reporter to the Government of India,  
 The Accountant-General, Military Department,  
 Military Account Offices in the Bengal Presidency,  
 The Commissary-General-in-Chief,  
 The Commissary-Generals of Circles,  
 The Director-General of Ordnance in India,  
 The Inspector-General of Ordnance,  
 The Surgeon-General, Her Majesty's Forces,  
 The Office Establishments of the several Arsenal, Depôts, and Factories in Bengal,  
 and to such other Imperial or Provincial Offices as may hereafter be notified as having adopted them.

19. On the occurrence of any vacancy hereafter in any office which has to be filled by open competition under these Rules, and when no candidate qualified under the Rules is available to fill such vacancy, appointments may be made under Rules 12 to 14.

20. These Rules shall take effect from the date of their issue.

21. Copies of these Rules may be obtained on application at the Office of the Home Department, Calcutta.

NOTICE is hereby given that the undermentioned plots of Nalhati Railway land, no longer required by the Government, situated in the district of Moorsheadabad, will be put up to sale on the 21st September next, in Moorsheadabad Collector's Office.

The purchasers of the plots will be subject to the following conditions:—

1st.—The purchasers will have no power to make any excavation on the land nearer than 15 feet from the Railway fencing, or plough it closer than 3 feet from its foundation.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid down at once.

3rd.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled, the sum deposited being forfeited to Government, and the estate to be again put up for sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

4th.—The plots will be sold revenue-free to the highest bidders.

5th.—The purchaser shall be put in possession on receipt of the orders of the Collector approving of the sales. But such possession shall be liable to be disturbed in case the final confirmation of the Board of Revenue should not be accorded to the proceedings.

## NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,

*Under-Secy. to the Govt. of Bengal.*  
The 24th November 1886.

The following revised advertisement is published in substitution for that which appeared at page 1084, Part II of the Calcutta Gazette of the 9th July 1884:—

## The Indian Law Reports,

*Published under Authority.*

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st April 1888, the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

*Terms of subscription payable annually in advance.*

For the complete series, including postage, Rs. 22-8.

### RESOLUTION ON THE POLICE ADMINISTRATION REPORT FOR CALCUTTA AND SUBURBS FOR 1887.

#### RESOLUTION.

##### POLICE.

*Dated Darjeeling, the 4th July 1888.*

#### READ.—

The Annual Report on the Police Administration of the Town of Calcutta and its Suburbs for the year 1887.

#### Read also—

The Annual Reports of the Chief Presidency Magistrate and the Presidency Magistrate of the Northern Division, on the Criminal Administration of their Courts for the year 1887.

The Reports for the year 1886 and the orders of Government thereon.

The following statement shows the number of cognizable and non-cognizable cases reported in the Town and Suburbs of Calcutta during 1887 and the two years preceding:—

			1886.	1887.
Cognizable—				
Penal Code	...	...	5,049	6,485
Miscellaneous	...	...	19,326	21,566
Non-cognizable—				
Penal Code	...	...	8,538	8,560
Miscellaneous	...	...	21,017	20,475
Total	...	...	53,940	55,092

The increase in cognizable crime under the Penal Code falls mainly under the head of public and local nuisances. There were 2,646 such cases in 1887 against 1,476 in 1886. The distinction between Penal and Miscellaneous is not strictly accurate, as under the former head are included nuisances punishable under section 34 of Act V of 1861 or under municipal and local laws. The increase in other cognizable cases falls under the heads of miscellaneous offences in the streets, which rose from 9,426 in 1886 to 11,585 in 1887. The decrease in non-cognizable offences under the Penal Code is due to a decrease from 3,622 cases of public and local nuisances in 1886 to 1,683 in 1887. The decrease in other non-cognizable offences is mainly due to the number of cases under the Conservancy Act having fallen from 19,806 in 1886 to 19,200 in 1887. The Commissioner of Police repeats the explanation he gave last year of the large decrease in 1886, continued in 1887, in the number of public nuisances in the Town of Calcutta punishable under Chapter XIV of the Penal Code. They have decreased from 4,625 in 1885 to 3,611 in 1886 and 1,682 in 1887. These offences include the adulteration of food and drugs, the sale of noxious food, and the sale of drugs or medical preparations as different drugs or medical preparations, and public nuisances of all kinds. The Commissioner of Police says the decrease under this head is met by a corresponding increase under section 68A of the Police Act, and that appears to be the reason, as corresponding changes in the figures have occurred in the Suburbs.

2. The number of persons arrested and summoned rose from 54,309 in 1886 to 55,175 in the year under review. The number of persons convicted was 48,334 against 46,818 in 1886, thus giving a larger percentage of convictions for every class of cases, except miscellaneous non-cognizable offences, in which the percentage fell to 82.51 from 83.23 in 1886. Out of a total of 10,859 persons convicted under the Penal Code in the Town and Suburbs, 6,301 were Hindus, 4,164 Mahomedans, 372 Christians, 17 Buddhists and Jains, and 5 Jews.

3. *False Cases.*—Out of 47,757 cases in the Town, only 119 were reported false. In the Suburbs 63 out of 7,335 cases were returned as false. In the Town, prosecutions were instituted in 31 cases against 17 in 1886. Of those prosecuted, 5 were punished at the instance of the Judge of the Small Cause Court for obtaining decrees on false claims. Three complainants were sentenced each to four years' rigorous imprisonment for arresting and bringing to Calcutta a ryot of the Hooghly district on a warrant obtained from the Chief Magistrate on a false charge of criminal breach of trust, the object being to prevent his appearance in a suit in Hooghly in which his zemindar was respondent. In 19 cases the defendants were sentenced to fine and imprisonment. Only one case was instituted by the Magistrate *suo motu*. In 53 cases fines were inflicted, and in 42 of these cases the aggrieved parties got compensation under section 552, Criminal Procedure Code. These results are more satisfactory than those of the previous year, when 13 persons only were prosecuted, of whom 11 were acquitted, while there were 130 false cases in 1886 against 119 last year. In the Suburbs, prosecutions were instituted in 61 cases out of 63 reported false. In 45 out of 61 cases the defendants were discharged. In only four cases were the complainants imprisoned, the term of imprisonment varying from one and a half to three months. These results are not satisfactory. Sir Steuart Bayley can scarcely believe that a mere sentence of fine was an adequate punishment in 12 out of the 16 cases in the Suburbs, in which the prosecution was successful.

4. *Property stolen and recovered.*—The value of the property stolen was Rs. 1,32,351 against Rs. 1,19,249 in 1886. Property to the value of Rs. 68,165 was recovered. The percentage of property recovered, 51.50, differs little from the normal. Only Rs. 1,778, shown as recovered, had been stolen in previous years.

5. *Ratio of cognizable crime to area and population in the Town and Suburbs.*—The ratio of cognizable crime to area and population in the Town and Suburbs was as follows:—

Area in square miles.	Population.	Proportion of true crime to each square mile.	Proportion of crime to population.
-----------------------	-------------	---	------------------------------------

6. *Cognizable crime in the Town.*—The following table shows the number of true cognizable cases reported within the Town during the last three years:—

CRIME.		1885.	1886.	1887.
Abetment of offence not committed	...	1	...	...
Class I.—Offences against the State, &c.	...	37	43	49
" II.—Serious offences against the person	...	167	186	213
" III.—Serious offences against person and property	...	139	190	185
" IV.—Minor offences against the person	...	40	50	58
" V.—Minor offences against person and property	...	2,156	2,085	2,223
" VI.—Other offences not specified above	...	1,855	3,419	4,408
Special and local laws	...	10,391	14,359	16,009
Total		14,786	20,332	23,145

There were 25 cases of offences relating to coins and stamps, a larger number than in any other year since 1880. In one case two Hindus were sentenced to five years' imprisonment for manufacturing base coins, and in another two constables of the Suburban Force were sentenced to four years' imprisonment for passing off as silver coin pice covered with quicksilver. There were, as in 1886, only 2 murders against an average of 6 for the last five years. In one case the evidence was insufficient for commitment, and in the other case, in which a discharged servant murdered his master, the jury did not convict, though the accused had confessed to the Coroner. Five Mahomedan shop-keepers of Chandney Bazar assaulted a Eurasian, fracturing his right leg. They were sentenced to three years' rigorous imprisonment each.

There were 164 true cases of house-breaking against 166 in the previous year, none of the former being of a serious type. The police have not succeeded so well as in 1886 in dealing with burglaries and thefts. Only 86 cases under the heads of burglary and lurking house-trespass were detected against 107 in 1886, and 94 persons only were convicted against 123. The Commissioner of Police attributes this want of success to the large body of convicts released at the Jubilee. He supposes that many of the convicts so released remained in Calcutta, and of these men the police would know nothing and would consequently be unable to supervise them effectually. The Lieutenant-Governor, however, observes that the actual number of burglaries committed shows no increase in the Town as might have been expected if the theory were correct. In the Suburbs, however, there were 1,720 cases of theft against 1,607 in 1886, and 786 cases only were detected against 856 in the previous year, while 858 persons were convicted against 950. The percentage of property recovered increased slightly. Under the head of criminal breach of trust, the Commissioner of Police reports that the most systematic offenders are cart-drivers who abscond with entire loads of grain or cloth. Sir Stuart Bayley agrees with him in thinking that if offenders of this class were committed to the Sessions, and not sentenced to short terms of imprisonment by the Presidency Courts, good results might be expected.

The number of convictions under the Hackney Carriage Act decreased slightly. There is nothing to show, though the matter was referred to in last year's Resolution, how many of these prosecutions were for omission to put up the bills of fares inside the carriage. This should be noted in the report for 1888. The increase in public and local nuisances is mainly due to a large number of prosecutions in cases of street obstructions under section 283, Indian Penal Code. There has been a large increase from 7,956 cases in 1886 to 9,744 in 1887 for miscellaneous street offences. There were 2,911 cases of cruelty to animals against 3,389 in 1886, and 59 persons were acquitted against 80 in the previous year. The increase in cases under the Port Acts from 2,266 cases in 1886 to 2,710 in 1887 was chiefly due to a larger number of prosecutions for carrying more than the licensed number of passengers. Under the Opium Act there were 75 cases and 79 convictions, against 42 cases and 44 convictions in 1886. In one case the police seized 30 maunds and 15½ seers of contraband opium. Three persons were severely punished, but the principal offender, for whose arrest a reward has been offered, is said to be still at large. The drug was in its crude state, and was

7. *Cognizable crime in the Suburbs.*—The following is a comparative statement of true cognizable crime during the past three years:—

CRIME.		1885.	1886.	1887.
Class I.	Offences against the State, &c. ...	16	27	15
II.	Serious offences against the person ...	88	62	77
III.	Ditto person and property ...	96	115	171
IV.	Minor offences against the person ...	28	35	15
V.	Ditto property ...	617	658	709
VI.	Other offences not specified above ...	678	717	717
Special and local laws ...		1,450	2,241	3,073
Total: ...		2,906	3,925	4,777

There were only five cases of rioting or unlawful assembly against 19 in the preceding year, and 34 persons were sent up against 90 in 1886. There were two murder cases; in both the accused were discharged. There were 29 cases of grievous hurt, against 17 in 1886 and an average of 25 for the five preceding years. In one case, Fakeera Mehter, an ex-convict returned from the Andamans, in a fit of jealousy cut off a portion of the nose of his mistress. One Sumaria Chamarin was sentenced to seven years' rigorous imprisonment for administering strychnine to her husband. The increase under the head of serious mischief and cognate offences from 11 to 39 against a yearly average of 3 is due to a number of prosecutions under section 284, Indian Penal Code (conveying persons for hire by water in a vessel in such a condition and so overloaded as to endanger life). There were 188 true cases of burglary and lurking house-trespass against 125 in 1886. The increase is probably due to the presence of a colony of 11,000 coolies employed in the Kidderpore Docks, and possibly also to the release of Jubilee prisoners. 50 cases were detected and 58 persons convicted. The corresponding figures for 1886 were 49 and 54. Out of Rs. 6,019 worth of property stolen, Rs. 4,094 were recovered, but this is due to the fact that property worth Rs. 4,119 was stolen in one case and the greater portion recovered. The number of thefts increased from 454 to 519, but 273 cases were detected and 310 persons convicted, against 246 cases and 297 persons in 1886. There was a slight decrease in the number of cases of public and local nuisances, while miscellaneous offences on the other hand rose from 1,470 to 1,841. The number of cases of cruelty to animals rose from 759 to 1,201, and out of 1,466 persons sent up for trial only 8 were acquitted.

8. *Non-cognizable crime in the Town.*—The decrease from 26,759 cases in 1886 to 24,511 in 1887 is principally due to a smaller number of cases of public and local nuisances, namely, 1,682 against 3,611 in 1886. This is met by a corresponding increase in the number of cognizable cases under section 68A of the Police Act. There were only 18,252 cases under the Conservancy Act against 18,816 in 1886. The number of cases of rioting, unlawful assembly, and affray rose from 205 in 1886 to 245 in 1887. There were 26 cases of adulteration of food and ghee, and 32 persons were convicted against 2 in 1886. A case instituted against one Taruck Nath Pattuck, to whom a forged currency note was traced, was withdrawn at the High Court, as the evidence of guilty knowledge was not considered sufficient. The forger, who lived at Sulkea, was tried at Howrah and ultimately convicted by the High Court.

9. *Non-cognizable crime in the Suburbs.*—There was a slight decrease from 2,796 cases in 1886 to 2,530 cases in 1887. There is nothing calling for notice in the figures.

10. *Suicides.*—There were 65 cases in the Town and Suburbs against 71 in 1886. 41 per cent. of the persons who committed suicide killed themselves by taking opium, while 32 per cent. hung themselves. There were 49 Hindus, 9 Mahomedans, and 7 Europeans. The excess of Hindus is remarkable, as the proportion of Hindus to Mahomedans living in the Town and Suburbs is little more than two to one.

11. *Accidental deaths.*—There were 283 accidental deaths against 275 in 1886. Only 89 were drowned against 111 in the previous year; but there were 133 deaths from causes not specified, against 91 the year before. 28 deaths were due to the persons killed being run over by carriages and horses, and 29 to falls from trees or buildings. Prosecutions were instituted against the drivers in 4 of these cases, 3 against private individuals, and 1 against the driver of a tramcar, who was acquitted. 4 servants of the Tramway Company were pro-

under trial at the close of the year. 133 drivers of public and private carriages were convicted for rash and furious driving out of 162 sent up for trial.

12. *Arms Act*.—The importation of fire-arms increased from 1,205 in 1886 to 1,616 in 1887. The Commissioner of Police attributes the increase to a belief on the part of importers that there would be a great demand owing to events in Burmah. There was a great decrease in the inland transport of arms and ammunition. In guns the number fell from 1,408 to 848. The decrease, as explained by the Commissioner, was mainly in the traffic with Northern India, which had been abnormally large in 1886. The number of cartridge cases imported rose from 357,900 in 1886 to 738,700 in the year under review. No explanation is given of this. The number of guns sold in Calcutta was 2,415 against 2,962 in 1886. This included 1,501 guns of native manufacture against 2,207 in 1886. There were 20 prosecutions, all for petty offences.

13. *European Vagrancy Act*.—42 persons were admitted to the Work-house under section 5 of the Act. Three persons were deported under section 17, namely, 2 to Liverpool and 1 to Melbourne. One of these was a ship's steward, another a hotel-keeper, and the third a destitute female with three children.

14. *Fire-Brigade Act*.—There were 13 fires in the Town and on the River, 5 in the Suburbs, and 20 in Howrah. The damage done is estimated at Rs. 67,355 against Rs. 1,75,750 in 1886. The most serious fire was on board the *Hutton Hall*, in which jute worth Rs. 23,000 was burnt. The Chief Officer was afterwards sentenced to one month's rigorous imprisonment for smoking in the hold, to which the Chief Presidency Magistrate attributed the fire.

15. *Strength and cost of the Police*.—The total cost of the Town Police was Rs. 4,72,168 against Rs. 4,74,544 in 1886, and that of the Suburban Police Rs. 1,55,676 against Rs. 1,62,187. The cost of the River Police was Rs. 29,974, of Government Guards Rs. 45,140, and of Additional Police Rs. 30,655. The Fort Police, Lock-up Guards, and Salt-Pass Stations cost Rs. 13,094.

The cost of the Town Police was met as follows :—

The diminished expenditure on the Town and Suburban Police was chiefly made up of savings under the heads of servants, rent, contingent charges and allowances. Hospital expenses increased from Rs. 16,475 to Rs. 18,748 owing to increased diet and clothing expenses. It should have been stated whether this was due to a larger average number of patients being treated in hospital, or to other causes. The number of admissions only rose from 2,222 to 2,327, which would not by itself account for the increased expenditure.

16. *The Police Force*.—The number of up-country men in the police rose from 1,907 in 1886 to 1,942, while the number of Bengalis fell to 163 from 189 in 1886 and 219 in 1885. Out of this total of 163 there are 72 officers, while the total number of officers who are up-country men is 96. The percentage of casualties was 12·15, or almost the same as in the previous year. 34 members of the force were punished judicially against 13 in 1886; on the other hand, 78 men only were dismissed against 102 the year before. Only 5 men deserted. The mortality fell from 9·39 to 8·08, but this only shows the number dying in hospital; many go away on sick leave and die at their homes. The number of vacancies was 361 against 375 in 1886 and an average of 478 in the five preceding years. This is satisfactory as testifying to the good conduct of the force, as the decrease occurred chiefly under the heads of dismissals and discharges. The fact that the number of resignations rose from 123 to 167 shows that the difficulty of getting new hands to stay, noted in last year's Resolution, has not been overcome.

17. During the year, 345 certificates were granted for hotels, shops for

Berhampore bowel-complaints and fever were more than usually common. The diseases most prevalent in the asylums were anæmia and debility, diarrhoea, dysentery, fever, pneumonia and phthisis. The Lieutenant-Governor is glad to find that there was no epidemic visitation of cholera in any of the asylums, although the disease was more or less prevalent in the towns where the asylums are situated. There were 86 deaths against 85 in 1886. This gives an annual death-rate of 9·11 per cent., which only slightly exceeds that of the asylums in England.

6. There is a somewhat long catalogue of cases of injury. In the Dullunda Asylum one criminal lunatic killed another by striking him with an iron chopper while engaged in the kitchen. Another lunatic was severely injured by a warder. At Dacca there were three cases of injuries of trivial character. There was one case of suicide at Cuttack, and two at Berhampore. One lunatic escaped from the Patna Asylum. The Lieutenant-Governor trusts that steps will be taken to guard, as far as possible, against the recurrence of such cases.

7. This year again the number of male lunatics confined in the Dacca and Cuttack Asylums was in excess of the accommodation provided for them. At Dullunda the space allotted for female lunatics has been found insufficient for the number of patients admitted. The sanction of Government has been accorded to the conversion of the jail hospital building at Dacca into an asylum for female lunatics, and to certain additions and alterations in the asylum buildings at Cuttack. It is hoped that the orders under which fewer districts are in future to send patients to Dullunda will afford sufficient relief. There is not a sufficient number of separate cells in the Dacca female asylum, but the defect is now being remedied. The Lieutenant Governor agrees with the Inspector-General of Civil Hospitals that the practice in some asylums of allowing harmless patients to sleep in the verandahs is objectionable, and he is requested to report whether, on the additional accommodation which it is proposed to provide being completed, this will any longer be necessary.

8. The following table shows the receipts and expenditure in each asylum during the year 1887 :—

9. The total expenditure on the asylums during the year was Rs. 78,996-11-4 against Rs. 88,109-11-7 in 1886. The reduction of Rs. 9,113-0-3 is due partly to the diminution in the Public Works charges, and partly to the saving effected in the cost of diet. The average cost for each patient was Rs. 83-12-2 against Rs. 91-6-6 in the previous year. Dullunda continues to be the most costly of all the asylums. The total expenditure on diet amounted to Rs. 19,137 against Rs. 22,061 in 1886, thus showing a reduction of Rs. 2,924, due partly to the smaller number of lunatics dieted, and partly to the reduction in the price of food-supplies. The value of articles of diet supplied from the manufacturing departments amounted to Rs. 40,694 against Rs. 11,160 the year before. The

The corresponding figures in 1886 were Rs. 20,061 and Rs. 18,401. The cost of clothing and bedding was Rs. 908 against Rs. 832, and the expenditure on account of manufactures amounted to Rs. 24,703 against Rs. 22,791 in 1886.

10. The number of patients in the European Asylum at Bhowanipore, at the beginning of the year, was 29, of whom 15 were males and 14 females. During the year 21 persons were admitted and 3 re-admitted, making a total of 53 patients; of these 8 were discharged cured, 2 were made over to military authorities, 2 were despatched to Europe under the Merchant Shipping Act, 4 were transferred to the care of friends, 2 were deported to Europe as still insane, and 4 died, leaving 31 patients in the asylum at the close of the year. The daily average number was 29 against 31 in 1886. The causes of insanity were chiefly intemperance, heredity and epilepsy. The death-rate in the asylum was 13·79 against 6·45 in 1886, but it is impossible to draw any conclusions from figures relating to so small an average population. The total expenditure amounted to Rs. 20,709 against Rs. 20,271 in 1886, and the average yearly cost of each lunatic was Rs. 714 against Rs. 654 in the previous year. The receipts from paying patients amounted to Rs. 8,115 against Rs. 6,722 the year before.

11. The sanitary condition of the asylum has been much improved by filling up an offensive drain on the western side of the building, and substituting a shallow saucer-drain of pucca masonry.

12. The management of all the asylums appears to have been efficiently conducted, and the members of the subordinate staff are all well spoken of by their immediate superiors.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the Report, be submitted to the Government of India in the Home Department.

The Committee notice with great pleasure the fact that since the last Exhibition of Native Arts and Industries was held under the Presidency of the late Governor, Sir James Fergusson, Bart., K.C.S.I., in 1883, the subject of the development of Native Arts and Manufactures has engaged the serious attention of both the Government and the people. The encouragement of native arts and indigenous manufactures is looked upon not only as an administrative necessity in the interests of economy, but also as an essential accompaniment to the practical development of the enlightened policy of satisfying the educational requirements of all the sections of the populations. The Poona Museum and Exhibition Committee propose to hold an Exhibition in or about October 1888, and hope to make it a greater success than those held before both from the educational and practical point of view. The Exhibition of this year is intended to serve a double purpose—to give encouragement to indigenous industries by bringing together to the notice of the general public such articles of native manufacture as are produced in the different parts of this country, and to secure the largest collection of exhibits that are likely to be both interesting and instructive to the hundreds of artizans and merchants engaged in the leading industries of these provinces.

It would, in the very nature of the thing, be very difficult to carry out these objects with out a representative and influential Committee organized for the purpose. It is a hopeful sign that such a Committee has been formed with His Excellency the Right Hon'ble Lord Reay, LL.D., G.C.I.E., as the Patron and the three Divisional Commissioners and Dr. Cooke, Prof. Scorgje among the Members. The formation of this Committee is by itself a circumstance of great encouragement, and the Committee now venture to publish this prospectus for the information of the general public, without whose co-operation and sympathy it would be difficult to carry any such undertaking to a successful termination. It may here be stated for general information that although the Exhibition is not limited to articles of any special class, the Committee would like to receive typical samples of Sind pottery, Shikarpur and other Sind embroidery, Hyderabad lacquerware, Cutch silverware, cotton prints, &c., Ahmedabad wood carving, brass jali work and kineops, Broach and Surat cottons and silks, Bombay inlaid work and carved furniture, Nasik and Poona brasswork, Yeola silks, Vijayadoorg hornware, Karwar carved woodware, Savantwadi paintings, &c., &c. The Committee hopes to secure the best exhibits of typical industries in the other provinces, so that the skill and workmanship displayed in these samples may be useful as models to the manufacturers of our Presidency. As far as funds permit, prizes will be awarded to the best exhibits of each class.

It has been suggested that an Exhibition of improved tools and machines used in the several manufactures would go to materially assist in the improvement of native

to induce manufacturers of machines and machine tools, hand tools, &c., to exhibit their articles. Should these endeavours be successful, a separate section will be added to the Exhibition. Much depends upon the pecuniary help which the Committee would receive from Government and from the rulers of Native States, as also from the Municipalities, Mercantile Associations and the general public, and the Committee trust that the undertaking will not fail for want of pecuniary support.

Intending Exhibitors are requested to fill in the accompanying form and send it with the exhibits under a separate cover. Exhibits must reach the Secretaries on or before the 31st August 1888. Space cannot be guaranteed to articles received after that date.

It may be stated here for the information of gentlemen having in their private collections beautiful specimens of articles exhibiting rare skill and workmanship that the Committee is prepared to receive their articles on loan, and undertakes that special care will be bestowed in exhibiting them and returning them safe to their owners within a reasonable time after the close of the Exhibition.

The exact day on which the Exhibition will be opened will be duly published hereafter.

Local showers have improved the state of crops in the sub-divisions. The state of things in the Sudder sub-division has not improved. Rivers have slightly risen. Prices rising.
	39 Pooree " 5, '88 0.78	0.78	Weather—hot. Rain is wanted for the first sowing of the winter rice crop ( <i>garad</i> ). <i>Beali</i> is being weeded. Common rice 21 seers 12 chittacks per rupee in the Sudder sub-division and 19 seers 12 chittacks in the Khoordah sub-division. The Sub-divisional Officer reports—"The seedling are withering, and unless rain falls soon, the prospects of the paddy crop will be ruined."
	39 Khoordah " 5, '88 1.40	1.40	Weather—cloudy and cool. The rice crop has suffered much from the long drought, and in parts of the district one-third of it has died. There is now every appearance of rain, and if it comes in sufficient quantity, much of the land will be resown. Prices shew a tendency to rise.
<b>CHOTA NAGPORE.</b>			
<i>South-West Frontier Agency.</i>			
CHOTA NAGPORE DIV.	41 Hazaribagh July 6, '88 5.78	5.78	Weather—seasonable. Ample rain everywhere. Prospects greatly improved. Agricultural operations in full swing. Sowings being made. Sugarcane recovering.
	42 Lohardugga " 7, '88 8.90	8.90	Weather—cloudy. Rain throughout the district. Cultivation vigorously going on. Prospects of crops good.
	42 Palamow " ... 8.66	8.66	The regular monsoon has not yet set in, though rain falls almost daily towards the evening. It is too soon yet to form an opinion of the effect of the late rain on the nearly burnt-up <i>gora</i> seedlings.
	43 Singhbhum " 6, '88 2.96	2.96	Weather—cloudy and cool. Abundant rain has fallen, and agricultural operations are everywhere going on. Paddy and <i>bhadoi</i> crops are being sown.
	44 Manbhum " 7, '88 5.29	5.29

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park-street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore .003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0.5° higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0.6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

of these conditions in the Bay, may have been merely a coincidence, or it may be they were directly connected with each other; but perhaps the latter is more probable, though the evidence available is not sufficient to prove any distinct connection between the two, or to prove the transfer of the disturbance from the one area to the other.

*Strength of the monsoon.*—The monsoon current may vary in two ways and its strength will depend on the two considerations of its velocity, and the depth or thickness of the current. No means are available for measuring the depth of the current, so that, in judging of the strength of the monsoon current from year to year, only its velocity can be measured and compared. The velocity can be measured accurately, but it will be seen that this alone can give only a rough approximation to truth. In the table below are given the actual daily velocity of the winds for June compared with the average for the same period at all the stations near the coast, from Diamond Island round to Gopalpore, at which winds have been registered for a sufficient length of time to give a reliable average:—

Out of the ten stations representing the coast line of practically the whole of the province, four stations show a wind velocity below the normal, and six show velocities above the normal; but the excess amounts are not only registered at the larger number of stations, but are in themselves much larger than the defects. Another interesting point is that the defects have been registered at the stations in the east and north-east of the Bay only, that is, in connection with the area where the disturbed conditions existed which prevented the monsoon from advancing over Bengal in a normal manner. Judged by the above figures, it would appear probable that the strength of the monsoon is quite equal to, if not above, the average of most years, for the wind movement during the month has been actually decidedly greater than in normal years, and thus the absence of rainfall can only be accounted for by the fact that the current was deflected from Bengal. It would therefore appear probable that when the cause of this deflection has become removed, it may be expected that the monsoon rains will be subsequently of normal heaviness.

*Pressure.*—For the first week in the month, owing to the advance of the feeble depression over the south-western districts of the province, pressure was decidedly below the normal; the defect equalling 0.04 inch over these districts, though the general pressure for the province was only in defect by 0.019 inch. In the second week the defect had increased very considerably, and thus, while at the southern stations pressure was nearly a tenth of an inch below the normal, the general defect was 0.064 inch. In the third week this defect remained practically unaltered, but in the fourth week the average pressure became normal, though the general distribution was a little anomalous; and in the eastern and western districts pressure was above the normal, and at the central stations it was below it, the defect being partly due to the existence of the low-pressure area, above referred to, over South Bengal. For the whole month, taking into consideration only those stations which have recorded observations for a series of years, and which therefore yield reliable data for averages, the mean pressure in the whole province of Bengal has been 0.024 inch below the normal. At almost all stations pressures have been in defect, and at Calcutta and Gya the defects have equalled about 0.04 inch. In Assam the mean pressure for the month has been 0.048 inch in defect of the normal.

*Temperature.*—The records of temperature during the past month have been of most exceptional nature, and owing to the absence of general rainfall from about the 10th to the 27th, and in some cases up to the 29th June, the temperatures registered at some stations have been higher than any previously recorded since the Meteorological Department was established. For the first week in the month the temperatures recorded were not very far removed from the normal, but in the second week temperature commenced to rise, and a period of unusual heat set in. The temperature generally was highest on Thursday, the 14th, and the mean temperature of the 24 hours from 10 A.M. of the 14th to 10 A.M. of the 15th was above the normal of the day by the following amounts: at Balasore 16.1°, at Midnapore 13.9°, at Calcutta 10.5°, and at Burdwan 10.1°. The maximum temperature recorded at the Alipore Observatory (Calcutta) on the 14th was 106.8°. The highest previously recorded temperature since the establishment of the observatory in 1874 has been 105.6° on April 14th.

was recorded on this day, the 14th of June 1888, at the Chowringhee Observatory, when the maximum thermometer indicated no less than  $107.2^{\circ}$ . The temperatures at the Chowringhee Observatory may perhaps be fairly accurately compared with the records of temperature which were formerly taken at the Surveyor-General's Office, and, so far as can be ascertained, the highest temperature previously recorded either at the Chowringhee Observatory or at the Survey Office as far back as 1854 has been  $106^{\circ}$ . Therefore both the records at the Alipore and Chowringhee Observatories prove that the temperature on the 14th June in Calcutta was about  $1.2^{\circ}$  to  $1.3^{\circ}$  higher than previously recorded by accurate observations. Very high maximum temperatures were also recorded at other stations:—thus Dehree registered  $114.5^{\circ}$  on the 14th, Gya  $113.6^{\circ}$  on the 14th, Balasore  $113^{\circ}$  on the 15th, Midnapore  $112.4^{\circ}$  on the 14th, and several other stations temperatures above  $110^{\circ}$ . The extreme heat is also shown by the fact that the mean temperature for the second week of June was nearly  $4^{\circ}$  in excess of the normal in Chutia Nagpur, Orissa, and South-West Bengal, and about  $2^{\circ}$  above it in East Bengal and South Behar.

The conditions of excessive temperature were again strongly marked in the third week, and during this period in Chutia Nagpur the average mean temperature was no less than  $13.2^{\circ}$  in excess of the normal temperature. In South Behar the excess equalled  $10^{\circ}$ , in South-West Bengal  $7.7^{\circ}$ , and in Orissa  $6.2^{\circ}$ . In the fourth week again Chutia Nagpur showed an excess of  $10.2^{\circ}$ , South Behar one of  $7.9^{\circ}$ , and South-West Bengal  $5^{\circ}$ . It will be seen that for the greater part of the month the temperature of all the western districts has been largely in excess of the normal. The mean temperature of the whole month has thus been nearly nine degrees in excess of the normal in Chutia Nagpur, and about five degrees above it in Orissa, South-West Bengal, and South Behar. In East Bengal temperature has also been in excess, but by only  $1.8^{\circ}$ , and in North Bengal and North Behar temperature has been almost normal. In Assam, on the other hand, the mean temperature for the month has been slightly below the normal.

**Rainfall.**—The date of the establishment of the monsoon, and the cause of its considerable delay, so that it was nearly a fortnight late, have already been discussed, and it therefore only remains to discuss the actual amount of rainfall which has been received. It need scarcely be stated that rainfall has been largely in defect in all districts or meteorological divisions, and the amounts of the defective falls vary from about eight and a half inches in East Bengal to nearly four inches in North Behar. Compared with the normal fall for June, and expressed as a percentage of that amount, the actual fall over the whole province has been only forty-eight per cent. of the usual amount.

The comparison of the various great divisions of the province during June with the normal is most accurately shown in the form of a percentage. The figures representing the rainfall of the month calculated in this way are included in the table below under the head of June. This table really gives a condensed summary of the rainfall statistics of the present year up to date for each meteorological division, the first six columns giving the actual rainfalls in each month in each division expressed as a percentage of the normal, while the seventh column of figures shows the actual divisional rainfall of the first six months of the year calculated in the same manner; the figure 100 will therefore represent a normal fall, above it excess, and below it defect. Judged by these figures, it will be seen that the rainfall during the past month has only been about a third of the normal in Orissa, Chutia Nagpur, and South Behar; while in South-West Bengal and East Bengal it has been little more than half the normal, and in North Bengal and North Behar it has been nearly two-thirds of it. The rainfall of the year has also been below the normal in all districts, the defect equalling about ten to fifteen per cent. in East and North Bengal and North Behar, and about twenty-five per cent. in South-West Bengal; in Orissa the defect has been nearly forty per cent., and in South Behar and Chutia Nagpur it is from fifty to sixty per cent. :—

The actual rainfalls during the month have varied from above 40 inches at some of the stations in the Western Duars to less than one inch at Kooshtea, and over a considerable area in the Gya and Shahabad districts, represented by such stations as Arrah, Shergati, and Pakri Barawan. The distribution of the actual rainfall for the month has been to a certain extent similar to that of ordinary years, and the heaviest falls have occurred in the north-east and east of the province, and the rainfall gradually diminishes in amount towards the

has also received an excess fall. Again in East Bengal there is a small area represented by Brahmunberiah, Naraingunge and Kishoregunge, where the falls have been also in slight excess. And in other districts, Mozufferpore, Raneegunge, Baraset and Hooghly also show slight excess falls. On the other hand, the greater part of the province shows a defect exceeding three inches of rain, and over a large area defects exceeding five and even ten inches are common; while in Darjeeling the defect has been 15.49 inches, and at Cox's Bazar no less than 20.79 inches.

Where the general defect of rainfall over the province averages as much as fifty-two per cent. of the normal, it is useless to attempt to indicate the particular districts where the defects have been seriously large, for almost the whole province would be included under this head. On the other hand, when taking up the rainfall in each of the smaller districts, there have been some of them which have received fairly good falls, and thus in the Burdwan, Julpigoree, Cooch Behar and Chumparun districts the falls have been nearly equal to the normal for the month.

In Assam, as has already been stated, heavy rainfall has been received during June, and thus at Dhubri no less than 42.76 inches have been received, at Silchar 28.46 inches, and at Sibsagar 13.52 inches.

The following table gives full data for the comparison of the actual and the normal rainfall of the month of June in all districts of the province of Bengal. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance or weight being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the weekly and monthly meteorological tables. The first column gives the normal or average district rainfall as determined from the rainfall observations of the past 15 years. The second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district. The third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage. The fourth column gives the same information as the third column in a slightly different form. It states as a percentage how much the district rainfall of the month varied in excess or defect from the normal rainfall, and is hence the difference between the numbers in the third column and 100:—

CALCUTTA, 10th July 1888.

# SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 6TH OF JULY 1888.

IN the report for the previous week it was stated that the monsoon rains had commenced over almost the whole of the province between the 27th and 29th of June, that is, about a fortnight later than usual. The falls up to the 29th ultimo in Orissa and parts of Behar had been rather scanty, but over the remainder of the province general and moderately heavy rainfall had been received. The conditions during the present week have been favourable for general rainfall over all parts of the province except Orissa, and over the greater part of the reporting area rainfall decidedly in excess of the normal has been recorded.

On the 30th of June, or the first day of the present week, conditions were fairly normal, except that wind directions showed a slight tendency to circulation over parts of South-West Bengal. On the 1st July, owing to a fall of the barometer, a distinct area of low pressure was formed over part of Behar and West and Central Bengal, and the lowest pressures recorded were at Ranigunge and Bhagulpore. Wind directions also showed on this day that there was a large amount of interaction taking place over the western and central parts of the province, and this was accompanied by very heavy rainfall. On the 2nd, pressure again fell at the central stations in Bengal, and the low-pressure area became more sharply defined, and a decided cyclonic circulation of winds was set up which affected the wind directions of the greater part of the province. On this day the centre of the depression was apparently between Berhampore and Ranigunge, and again heavy rain was received at many stations. On the 3rd of July the small depression had advanced in a north-westerly direction, and it had almost passed out of the province, and its centre was apparently to the west of Buxar and Dehree, though the western stations in Behar still showed distinctly the influence of the feeble storm. The wind circulation accompanying the depression had advanced with it, and its influence in Bengal had diminished rapidly, though again on this day moderate to heavy rain was received. The depression subsequently advanced into the North-West Provinces, where it filled up and disappeared. On the 4th ordinary monsoon conditions obtained in Bengal, and there were no points calling for comment; but on the 5th instant again a distinct tendency to cyclonic circulation of winds appeared over parts of Western and Central Bengal, and on the morning of the 6th the circulation had been transferred to the south of Chutia Nagpur, though no definite barometric depression appears to have formed in connection with it. The existence, however, of this wind circulation again rendered conditions favourable for the production of rainfall, and moderate general rain was received, though the rainfall on the last two days of the week was not so heavy as during the existence of the depression in the earlier part of the week. As the result of these actions, therefore, rather heavy rain has fallen in all districts except Orissa, and an average fall of from four to six inches has been reported during the week.

*Pressure.*—The variations of pressure from day to day have not been of much importance, for the depression above described was an extremely feeble one. For the whole province the mean pressure for the week has been generally slightly below the normal, and taking into consideration only the stations for which reliable averages have been obtained, the mean pressure of the province has been 0.029 inch below the normal. In Assam the defect has averaged 0.042 inch.

*Temperature.*—The temperatures registered during the week under review present a marked contrast with those of the previous three weeks, and the mean temperature of the whole province has now become distinctly below the normal; the defect averaging 0.6°. The largest defects have been in East Bengal, North Behar, and Chutia Nagpur, where they have exceeded 1°; but on the other hand, owing to the comparative absence of rain in Orissa, the temperature of this district has been 1.2° in excess of the normal. In Assam temperature has been below the normal by 1.1°.

*Rainfall.*—As has been above stated, has been heavy in all districts except Orissa. The falls in East Bengal, North Bengal, and Chutia Nagpur vary between five and six inches; in South-West Bengal and South Behar they are between four and five inches; in North Bengal they have equalled three and a half inches; and in Orissa the rainfall has averaged only 1.34 inch. Compared with the normal, the falls in South-West Bengal, East Bengal, North Behar, and Chutia Nagpur have been between two and three inches in excess; in South Behar the excess fall has equalled one and a third inches; but the falls have been in defect in North Bengal and Orissa. The defect in North Bengal equals about twelve per cent. of the normal, but that in Orissa is more serious, and it equals about fifty per cent. of the normal fall.

Centres of heavy rainfall during the week have been rather numerous, and a very large number of stations have received almost as much rain during the week as they had previously received during the whole of June. Centres of particularly heavy rainfall are to be found at such stations as Ranigunge, which has received 12.43 inches in the week, while Mankur in the Burdwan district has recorded 10.68 inches, Maliara (Bankoorah district) 9.02 inches, Cox's Bazar 19.98 inches, Buxa (Darjeeling district) 18.78 inches, Darjeeling 12.23 inches, Mozufferpore 10.43 inches, Sitamurhi (Mozufferpore district) 10.75 inches, and Chatra (Hazaribagh district) 9.32 inches. Several of these stations, it will be seen, have been directly influenced

by the depression above described.

On the other hand, the only districts in which scanty falls have been received, and practically almost the only stations also which have received little rain, are those in Orissa; but even here at such stations as Cuttack, Baripada, Jellasore, Balasore, Bhudruck, Chandbali, Dhurmsalla, Banki, and Jajpur, fairly good rain has been received.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the week ending Friday, the 6th of July 1888:—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph. The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

MEMORANDUM.

THE leading features in connection with the vital statistics of the principal Municipalities in Bengal, for the week ending 23rd June 1888, are the following:—

1. That births and deaths were registered in these Municipalities at the rates, respectively, of 16·8 and 24·2 per 1,000 of population, as opposed to 17·3 and 23·8 per 1,000 in the preceding week ending 16th June.

2. That the highest proportions of births and deaths were furnished by the following Municipalities:—

<i>Births.</i>				<i>Deaths.</i>			
			Ratio per mille.				Ratio per mille.
Comillah	...	...	38·5	Gya	...	...	57·4
Narainganj	...	...	38·1	Darjiling	...	...	39·1

Monghyr	...	...	29·8	Narainganj	...	...	37·2
				Serampore	...	...	33·4
				Puri	...	...	29·4

3. That, as compared with the results of the preceding week, there was an enhancement of mortality, to a greater or less extent, from all the diseases, excepting bowel-complaints and injury:—

	Ratio per mille during the weeks ending—	
	23rd June 1888.	16th June 1888
Cholera	2·5	2·1
Small-pox	·3	·2
Fever	9·8	9·8
Bowel-complaints	2·4	2·8
Injury	·5	·7
Other causes	8·7	7·9

4. That eliminating small-pox and bowel-complaints, which proved notably fatal, the former only in the Hughli town, viz., at the rate of 2·7 per 1,000 of population, and the latter in the Puri Municipality, viz., at 10·5 per 1,000, and injury, which did not exhibit any local severity, cholera, fever and the maladies returned under the head of "Other causes" manifested exceptional mortality in the following Municipalities:—

*General remarks on the fluctuation of principal staples carried over the East Indian Railway during four weeks ended 26th May 1888.*

**INCREASES.**

**Coal and coke.**—There was an increase in both the upward and downward despatches. The former was due to demands on Foreign Railway, and the latter to despatches to the Eastern Bengal State Railway *via* the Jubilee Bridge.

**Piece-goods, European.**—This increase was due chiefly to despatches from Howrah, consequent on the large number of arriages during the period.

**Gunny.**—Due to export traffic in grain and seeds.

**Other fibres, raw.**—Due to the continuance of increased despatches of hemp from Allahabad, referred to in previous reports, and also to despatches of saboy grass from Bariarpur to Bally for the manufacture of paper.

**Fruits, other kinds.**—Principally in betel-nuts from Howrah and Sealdah.

**Rice (husked and unhusked).**—There was a decrease in the weight carried, attended with a slight increase in earnings; the former was due to less despatches to Howrah, and the latter to larger despatches up-country.

**Government Stores.**—Chiefly in ammunition from Howrah for the Ordnance Department.

**Minerals.**—The increase was due to the same cause as assigned in previous months, *viz.*, the demand in Calcutta owing to the construction of the Kidderpore Dock-works.

**Iron.**—Chiefly due to despatches of pig iron from Howrah to Cawnpore and Peshawar.

**Salt.**—There was a decrease in weight carried, attended with a slight increase in earnings; the former was due to despatches from the Bombay Baroda and Central India Railway *via* Agra and Cawnpore, and the latter to long distance traffic *via* Ghaziabad from the Punjab Salt Mines at Kheora to Patna.

**Seeds.**—The increase was chiefly in linseed and mustard and rape seed to Howrah for shipment to Europe.

**Spices.**—This is due principally to large despatches of chillies from Mokamah and stations on the Tirhoot State Railway.

**Sugar, refined and unrefined.**—The small increase in the earnings was due to the short distance cross traffic between Aligarh and Hathras, and Ghaziabad and Delhi, for the Bombay Baroda and Central India Railway in both cases.

**Tobacco.**—Due almost entirely in the despatches from Tirhoot.

**Potatoes.**—The increase was principally in despatches from Patna and Dinapore to Calcutta.

**Bones.**—Due to despatches from numerous stations to Bally, where crushing mills have been erected during the last few years.

**DECREASES.**

**Cotton.**—Due to same cause as reported last month, *viz.*, bad crops.

**Wheat.**—Due to a poor demand for export and low prices in Calcutta.

**Gram and pulses.**—The decrease was principally from stations between Allahabad and Cawnpore.

**Other rain and spring crops.**—Due to larger despatches last year to Agra to meet scarcity in Rajputana.

**Brass and copper.**—Due to less despatches owing to high prices.

**Railway material, Foreign.**—The decrease was both from Howrah and *via* Jubbulpore, owing to the completion of the Indian Midland Railway.

*Limits within which Fishing Stakes are prescribed.*

CLAUSE 1 of Notice to Mariners (No. 155 of the year 1888), issued by the British Admiralty, is republished.

The Marine Department, Bombay, has given notice, dated 2nd May 1888, that fishing stakes are not allowed to be placed, in the approaches to that harbour within the following prescribed limits :—

1. Within the space bounded on the east by the western port limit defined by a line drawn from Malabar Point to Outer Light Vessel, and thence to Kundari Island; on the north by Prongs Light-house bearing East; and on the south by Kundari Light-house bearing East.

2. Fishing stakes are not allowed to be placed within the ranges of visibility of either Prongs or Kundari Island Lights, outside the 10 fathoms line of soundings.

3. Fishing stakes are placed within the 10-fathoms line both northward and southward of the limits (Prongs Light-house bearing East, and Kundari Island Light-house bearing East) within the ranges of visibility of those lights; and Mariners are therefore warned of the danger incurred should they come within the 10-fathoms line either northward or southward of those limits.

4. Within the port limits, the fairway to the anchorage is kept free from fishing stakes, except the line of them  $2\frac{1}{2}$  miles north-eastward of Thull shoal.

*The Storm Signals to be used on the approach of a Cyclone.*

CLAUSE (1) of Notice to Mariners (No. 152 of the year 1888); issued by the British Admiralty, is republished :—

The following information, relative to the establishment of Storm Signals at the port of Chittagong, has been received from the Harbour authorities at that place :—

The Storm Signals will only be used to give warning of the early approach of a severe cyclone, with its attendant storm-wave. They will be hoisted on the yard-arm of the flag-staff at Sudder Ghât, and on the yard-arm of the flag-staff on Jaldia Hill, on the receipt of instructions from the Meteorological Department, as follows :—

*Day Signals.*

1. A ball indicates that a severe cyclone, of which the centre is in the neighbourhood of Akyah, will probably advance towards Chittagong.
2. A drum indicates that a severe cyclone, with its attendant storm-wave, is approaching Chittagong.

*Night Signals.*

3. Three lights, placed vertically, indicate that a severe cyclone, of which the centre is in the neighbourhood of Akyah, will probably advance towards Chittagong.

## NOTICE BY THE ACCOUNTANT-GENERAL, BENGAL.

## SUPPLY BILLS.

NOTICE is hereby given that supply bills for sums of Rs. 500 and above in even rupees are usually obtainable on the treasuries named below at the rates of premium shewn.

Any person desiring to obtain a supply bill should send to the Bank of Bengal, Calcutta, a written application containing the following information—(1) his own name and address; (2) the name of the person to whom payment is to be made; (3) the treasury on which the bill is to be granted; and (4) the amount for which the bill is to be granted. With this application the cost of the bill (the amount plus the premium) should be paid into the Bank. If payment by telegram is desired (but this is admissible only in cases in which the name of the payee has been previously registered in the Accountant-General's office), the fact should be stated in the application, and an additional rupee paid with the cost.

The Bank of Bengal will, if the amount is available at the treasury named, receive the money tendered, and grant a receipt, returning the application therewith. The receipt and the application should then be sent to the Accountant-General's office, by which the bill will be granted.

The Bank of Bengal will be advised by the Accountant-General on the 1st and 16th of each month of the amounts available at the several treasuries, and will receive the amounts tendered by the first comers till those amounts are exhausted.

If the Bank refuses to receive any sum tendered owing to the amount not being available at the treasury, the application will be retained by the Bank and forwarded by it to the Accountant-General, who will advise the Bank and the applicant if the amount can be made available.

CE is hereby given that the undermentioned plots of Nalhati Railway land, no longer required by the Government, situated in the district of Moorsheadabad, will be put up to sale on the 1st September next, in Moorsheadabad Collector's Office.

1st.—The purchasers of the plots will be subject to the following conditions:—

1st.—The purchasers will have no power to make any excavation on the land nearer than 15 feet from the Railway fencing, or plough it closer than 3 feet from its foundation.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid down at once.

3rd.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled, the sum deposited being forfeited to Government, and the estate to be again put up for sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

4th.—The plots will be sold revenue-free to the highest bidders.

5th.—The purchaser shall be put in possession on receipt of the orders of the Collector approving of the sales. But such possession shall be liable to be disturbed in case the final confirmation of the Board of Revenue should not be accorded to the proceedings.

Chittagong Collectorate, the 5th June 1888.

A. MANSON, Collector.

NOTICE is hereby given that the undermentioned plots of land which are no longer required by Government for the purpose for which they were acquired will be put up to auction at the Shahabad Collectorate, on the 14th of August 1888, and will be sold to the highest bidders on the conditions specified below:—

(a). On the termination of the sale the auction purchaser will be required to deposit a sum equal to one-fourth of the purchase money, failing which the land will be resold immediately.

(b). Within a period of 30 days from the date of sale, the auction purchaser must pay the entire amount due from him on account of the sale; in the event of his failing to pay in the money within the prescribed time, the deposit of one-fourth money will be forfeited by him and the land resold.

(c). If the price obtained by the second sale falls short of that offered in the original sale, the first auction purchaser will be required to make good the difference.—

The 24th November 1886.

The following revised advertisement is published in substitution for that which appeared at page 1084, Part II of the *Calcutta Gazette* of the 9th July 1884:—

**The Indian Law Reports,**

*Published under Authority.*

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st April 1888, the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

*Terms of subscription payable annually in advance.*

No. 2424, dated Bombay Castle, the 12th July 1888.

From—J. DE C. ATKINS, Esq., c.s., Under-Secretary to the Government of Bombay, General Department,

To—The Secretary to the Govt. of Bengal, Public Works Department.

IN continuation of my telegram of the 7th instant, I am directed to forward herewith, for the information of the Government of Bengal, copy of a Resolution of this Government, No. 2422, dated 12th idem, and of the Notification issued thereunder, regarding the enforcement of the B Quarantine Rules at Aden and Perim against arrivals from the Persian Gulf.

*Quarantine: Imposition of—at Aden and Perim against arrivals from Persian Gulf.*

No. 2422, dated Bombay Castle, the 12th July 1888.

**RESOLUTION**—By the Government of Bombay, General Department.

**TELEGRAM** from the Government of India, dated 11th July 1888:—

“Your telegram, 7th. Imposition of quarantine at Aden and Perim against arrivals from Persian Gulf sanctioned.”

A notification should be published in a *Bombay Government Gazette Extraordinary* bringing the B Quarantine Rules into operation at Aden and Perim against arrivals from the Persian Gulf.

2. Copies of the notification should be forwarded to the Political Resident, Aden, and the other Officers and Departments concerned, for information, with reference to Government Resolution No. 2362, dated 7th instant. Copies should also be forwarded to the Governments of India, Bengal, Madras, and Ceylon, and the Chief Commissioner of Burma.

No. 2422, dated Bombay Castle, the 12th July 1888.

**NOTIFICATION**—By the Government of Bombay, General Department.

IN exercise of the power conferred by Act I of 1870, the following Rules for Quarantine against Cholera have been made by the Government of Bombay, with the previous sanction of the Governor-General in Council: they have effect from the 7th instant in the Port of Aden and at Perim as a temporary measure:—

I.—The Commander of every vessel, including bungalows or other native craft, arriving from the Persian Gulf, shall, before entering the harbour, indicate

- II.—Such Commander shall not, except as hereinafter provided, allow any communication, either with the pilot boat, except orally, or with the shore, or with any other vessel or boat in the harbour.
- III.—Immediately on arrival the Commander shall cause the letter R of the Commercial Signal Code to be hoisted, and shall keep the said flag flying during his stay in port or until authorized by the Health Officer to haul it down. If communication with the shore is not desired, the vessel shall anchor at such place as may be pointed out by the Port authorities, having regard to the season of the year. If communication with the shore is desired, the Health Officer shall go alongside the vessel, and, after all necessary enquiries, shall direct the Commander to take the vessel to the quarantine anchorage duly appointed and notified in that behalf by the Resident, there to remain for a period of seven days from the date of arrival, or for the shorter period prescribed in Rule IV, and undergo disinfection, which should apply as well to crew, passengers, effects, and susceptible goods.
- IV.—If the Health Officer of the Port has sufficient evidence that no cases of a suspicious nature have taken place on board during the voyage, and if the vessel is besides in good hygienic condition, the duration of the quarantine will be diminished according to the following scale:—
- |                            |                 |     |                                  |
|----------------------------|-----------------|-----|----------------------------------|
| After eight days of voyage | ...             | ... | six days of quarantine.          |
| Do. nine                   | do.             | ... | five do.                         |
| Do. ten                    | do.             | ... | four do.                         |
| Do. eleven                 | do.             | ... | three do.                        |
| Do. twelve                 | do.             | ... | two do.                          |
| Do. thirteen               | do. and upwards | ... | twenty-four hours of quarantine. |
- V.—If during the period a vessel is at the quarantine anchorage aforesaid, any case or cases of cholera should occur on board, the said vessel shall remain in quarantine for a period of seven days from the date of the last case occurring, and be subject to all the prohibitions provided for in Rule III.
- VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Resident as places of quarantine, there to remain for a period of seven days. If a case of cholera occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.
- VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.
- VIII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine, to be subsequently removed by members of their crews.
- IX.—All vessels arriving at Aden and Perim, which may have communicated with vessels coming from the Persian Gulf, shall be subjected to the same quarantine as vessels arriving at Aden and Perim from that Port.
- X.—All vessels which have undergone quarantine in the manner above prescribed should have the fact clearly stated on their Bills of Health.

NOTIFICATION No. 86Mne.

*The 24th July 1888.*—In modification of Rule 4 of the Rules for the registration, licensing and regulation of cargo-boats published at page 1316, Part I of the *Calcutta Gazette* of the 18th December 1878, as amended by Government order No. 69, dated the 17th May 1880, the Lieutenant-Governor sanctions the following amended rule, which is hereby published for general information,

C: W. L. HARRISON, *Lieut.-Col., R.E.*,  
*Offg. Joint-Secretary to the Govt. of Bengal, P. W. Dept.*

4. No license shall be granted to any cargo-boat until such boat has been surveyed by a Surveyor duly appointed for the purpose, and he shall have granted a certificate stating (a) that the boat is in good order and suited for the conveyance of cargo within the port, (b)

ascertained by the following rules, and (c) the number of crew required for the safe navigation of such boat according to the annexed scale:—

*Rules for ascertaining tonnage of boats.*

*Length.*—Measure the length from the inside stem to inside stern post, marked A B on sketch.

*Breadth.*—Measure the breadth from side to side inside ceiling plank under the deck beams amidships, marked C D on sketch.

*Depth.*—Measure the depth from underside of deck beam amidships to upperside or floor ceiling plank, marked E F on sketch.

Then multiply the length, breadth, and depth together, and the product—

by .009 for flush-decked, square-built, and open cargo-boats;

by .007 for bazar boats;

by .0064 for open country boats, such as pansways, bhurs, dinghees, and bhowleahs;

by .0088 for open country boats known as hollahs;

by .0063 for ditto ditto chotes,

The result will be the tonnage of the boat.

The foregoing formula shall be used in measuring boats of class 1 up to a burden of 50 tons, but the measurement of boats of that class exceeding 50 tons shall be made under the rules of the Merchant Shipping Act, provided that the Surveyor shall be authorised to measure boats of class 1 of any size under the rules of the Merchant Shipping Act when the owners show that the measurements made according to the above formula are inaccurate or oppressive.

Having ascertained the tonnage of a boat, that is, the quantity of cargo she is authorised to carry in accordance with the foregoing rules, the Surveyor shall, by a conspicuous mark on the boat's side, indicate for every boat exceeding 10 tons the depth to which she will be immersed when carrying the quantity of cargo for which she is licensed.

Number of crew to be carried by cargo-boats.

## NOTICE BY THE ACCOUNTANT-GENERAL, BENGAL.

## SUPPLY BILLS.

NOTICE is hereby given that supply bills for sums of Rs. 500 and above in even rupees are usually obtainable on the treasuries named below at the rates of premium shewn.

Any person desiring to obtain a supply bill should send to the Bank of Bengal, Calcutta, a written application containing the following information—(1) his own name and address; (2) the name of the person to whom payment is to be made; (3) the treasury on which the bill is to be granted; and (4) the amount for which the bill is to be granted. With this application the cost of the bill (the amount plus the premium) should be paid into the Bank. If payment by telegram is desired (but this is admissible only in cases in which the name of the payee has been previously registered in the Accountant-General's office), the fact should be stated in the application, and an additional rupee paid with the cost.

The Bank of Bengal will, if the amount is available at the treasury named, receive the money tendered, and grant a receipt, returning the application therewith. The receipt and the application should then be sent to the Accountant-General's office, by which the bill will be granted.

The Bank of Bengal will be advised by the Accountant-General on the 1st and 16th of each month of the amounts available at the several treasuries, and will receive the amounts tendered by the first comers till those amounts are exhausted.

If the Bank refuses to receive any sum tendered owing to the amount not being available at the treasury, the application will be retained by the Bank and forwarded by it to the Accountant-General, who will advise the Bank and the applicant if the amount can be made available.

**OBSERVATIONS.**—By the orders contained in the Resolution of November 1881, cited in the preamble, the Government of India introduced the present system of classifying telegrams, by which, instead of being despatched simply in order of presentation at the telegraph offices, they receive preference for despatch according as they are paid for as "urgent," "ordinary," and "deferred." At the same time it was directed that all State messages should be sent as "deferred," unless specially marked as "urgent" by the sender, and that no State message should be despatched as an "ordinary" message. In July 1887, however, from statistics showing the number of State messages classed as "deferred" and "urgent" during the five years ending 1886-87, it appeared that the percentage classed as "urgent" was very much greater in the case of State than of private messages. As this pointed to the withdrawal of the prohibition to send State messages as "ordinary," the opinions of the Local Governments and Administrations and of the Account Officers of Government were requested on the subject. They were asked to report whether they considered that the proposed change would lead to economy, and whether they could

2. The opinions called for have now been obtained and considered; and the attention of the Government of India has been particularly drawn to the fact that in many cases State messages are sent as "urgent" merely to save the delay of a day which is presumed to result from sending them "deferred." Nothing is gained by sending such messages "urgent" which would not be equally secured if they were permitted to be sent "ordinary"; it has been consequently determined that the order which forbids the use of "ordinary" State messages shall be repealed.

**RESOLUTION**—In future, State messages may be classed as "urgent," "ordinary," or "deferred," at the discretion of the sender.

2. Without laying down any precise rules for the classification of telegrams, the following general principles are prescribed for the guidance of officers, who should also bear in mind the necessity for keeping the expenditure as low as possible:

- (1) When it is not necessary that a reply (by post or wire) should be despatched within office hours of the same day, the message should be sent "deferred."
- (2) When it is considered essential that a reply should be sent the same day, the message should be sent "ordinary."
- (3) "Urgent" messages should be used only—
  - (a) in cases of real emergency;
  - (b) in cases where the despatching officer knows that the line is for any reason blocked, and considers his message sufficiently important to take precedence of ordinary traffic.
- (4) Telegrams should, except when extreme precision is important, be expressed in as few words as are consistent with clearly conveying the intended meaning; and mere auxiliary or connective words, which can obviously be filled in by the receiver, should be omitted.

3. As regards the check over expenditure, the Government of India, after consideration of the various opinions which have been expressed, does not consider it necessary to prescribe any further check than that of the ordinary controlling authority, who may at any time call upon a subordinate to justify any apparently large expenditure upon telegrams. The Government of India, however, invites the attention of Local Governments to the desirability of including telegraph charges within the contract system of contingencies as the best means of preventing extravagance and abuse of the discretion regarding classification conferred by these orders.

4. The orders contained in this Resolution will take effect from the 1st August 1888.

**ORDER**,—Ordered that copies of this Resolution be communicated to the Departments

PART IB.

## ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

### MUNICIPAL AND LOCAL.

#### NOTIFICATION.

*The 17th July 1888.*—It is hereby notified for general information that, in exercise of the power vested in the Local Government by section 351 of Act III (B.C.) of 1884, and on the recommendation of the Commissioners of the Basirhau Municipality, made at a meeting, the Lieutenant-Governor confirms the bye-laws set forth below, which have been framed by the Commissioners of the said Municipality, under section 350 of the said Act.

COLMAN MACAULAY,  
*Offg. Chief Secy. to the Govt. of Bengal.*

#### *For the Conduct of Municipal Business.*

1. The ordinary meetings prescribed by section 38 of the Act shall be held at the office of the Commissioners at a fixed hour of a fixed day of each month, to be decided upon at the last ordinary meeting of the preceding year.

2. A notice of the business to be brought forward at every meeting shall be circulated, by hand or post, to each Commissioner, and shall be hung up at the office of the Commissioners not less than three days before the date of the meeting.

3. Any Commissioner desirous of submitting any motion to the meeting must forward a copy of such motion to the Chairman not less than seven days before the date of such meeting for incorporation in the notice of business. A notice book shall be kept in the office of the Commissioners in which all notices of motions shall be entered. All such notices shall be dated and numbered as received.

4. At ordinary meetings the business shall be transacted in the following order, unless the President, with the consent of the majority of the members present, determine otherwise:—

- (a) The minutes of the last ordinary meeting, and of any special meeting since held, shall be laid before the meeting, and, if approved as correctly entered, shall be signed by the Chairman.
- (b) Any business postponed from the last ordinary meeting.
- (c) The business contained in the notice of the meeting prescribed by Rule 2 above in the order in which it appears in the notice paper, unless the President, with the consent of the majority of the members present, determine otherwise.
- (d) Additional business brought forward by the President with the consent of the majority of the members present, provided that any decision recorded or resolution adopted in regard to such business shall be subject to confirmation by the next ordinary meeting.

5. At an adjourned meeting, no business, save that which the original meeting left unfinished, shall be transacted, except as provided in Rule 7 below.

6. At a special meeting no business save that for which the meeting was called shall be transacted, except as provided in the following rule.

7. Provided, however, that any additional business may be brought forward at an adjourned or special meeting, subject to the conditions of Rule 4(d) above, and also subject (in the case of an adjourned meeting) to the full quorum required by section 42 of the Act.

8. Every motion or amendment shall be reduced to writing and seconded before being put to the meeting or debated. The mover of any motion or amendment may withdraw the same at any period of the debate.

9. Every amendment shall be so worded as to form an intelligible sentence either alone, or in its proper place, in an original motion, as the case may be; provided that no amendment can merely negative the original motion.

10. The President may, for reasons to be entered in the minutes of the proceedings—

(a) rule that a motion or amendment is illegal or out of order; and

(b) make such alterations in a motion or amendment as shall, in his opinion, render it legal and in order,

and may in case (a) refuse to put the motion or amendment to the meeting, and in case (b) refuse to put the motion or amendment to the meeting, unless and until the proposer and seconder accept the alterations so made, and the decision of the Chairman shall be final.

11. In discussing questions coming before the meeting, a Commissioner shall speak from his place, shall rise when he speaks, and address the President. A Commissioner shall not be allowed to read his speech, but he may refresh his memory by referring to notes, and he may read, as part of his speech, passages from books or papers cited in support of his argument. At any time, if the President rises, any Commissioner speaking shall immediately resume his seat. No Commissioner shall be heard except upon business then regularly before the meeting, or by permission of the President specially obtained, in explanation of what he had said in a previous debate. No Commissioner, other than the mover, shall speak more than once upon a question, except by way of interpellation, or by permission of the President, but the mover shall be allowed, if he have spoken to the question when making his motion, to close the debate with a reply. A Commissioner who has spoken upon a motion may speak once again upon any amendment thereof afterwards moved. And a Commissioner may explain, by permission of the President, what he has before spoken, if it has been misunderstood. No Commissioner in debate shall name another Commissioner.

12. Votes shall be taken either by show of hands, or by poll, or by both. The votes of the Commissioners at a poll shall be taken by the President. Any three Commissioners present may demand a poll. When the show of hands has been taken, the President shall declare whether the resolution has been carried or not, and every matter shall be held to be decided and concluded on such declaration being made, unless a poll be at once demanded.

13. Voting by proxy is prohibited; and no member may vote upon any motion or amendment unless he be present in person at the time when it is put to the vote.

14. When an amendment upon any motion is moved, or when two or more such amendments are moved, the President, when taking the sense of the meeting thereon, shall read the terms of the original motion and of the amendment or amendments proposed. If there be but one amendment proposed, the question shall be put as proposed to be amended. If the amendment be carried in the affirmative, the original motion falls; but if the amendment be negatived, the original question shall be put to the meeting. If more than one amendment be proposed, the President shall put that amendment first, which he thinks may most conveniently be first disposed of; and so, if necessary, of all the others. If any motion as made involves several points, the President, at his discretion, may divide it, so that each point may be determined separately.

15. When any Commissioner shall have occasion to ask a question of another Commissioner relating to the business of the meeting, he shall ask the question through the President.

16. Subject to the foregoing rules, the President shall regulate the course of all business brought before any meeting of the Commissioners. He shall preserve order, and all points of order shall be decided by him. No discussion on any point of order shall be allowed, unless the President shall think fit to take the opinion of the Commissioners thereon. Any Commissioner may at any time submit a point of order for the decision of the President.

17. No subject once finally disposed of can be reconsidered within six months, except on a question signed by not less than two-thirds of the Commissioners.

18. For the purpose of taking into consideration any particular business, a meeting may resolve itself into a Committee of the whole of the Commissioners present. When this has been determined, the rule prohibiting any person from speaking, except when standing, or more than once on the same question, shall be deemed suspended until the meeting resumes.

19. The Commissioners in meeting may from time to time appoint such and so many Committees, either of a general or special nature, and consisting of such Commissioners as they think fit, for any purposes which, in the opinion of the meeting, can be conveniently regulated and managed by such Committee; but the business transacted by any such Committee shall be subject to the approval of the Commissioners in meeting.

20. The members of each such Committee shall hold office for one year only, but shall be eligible for re-appointment.

21. Any member of a Committee, who, without the previous permission of the Chairman of the Commissioners, shall fail to attend three consecutive meetings of such Committee, shall thereby cease to be a member thereof, and the Committee shall apply to the Commis-

22. A Committee may meet and adjourn as it thinks proper. The quorum shall consist of not less than three of its members. The President shall be the Chairman of the Commissioners, or, in his absence, the Vice-Chairman, or, in their absence, any member present elected by the meeting. The rule prohibiting any person from speaking, except when standing, or more than once on the same question, shall not apply to meetings of a Committee.

23. Except as otherwise provided by the preceding two rules, the provisions of the law and of these rules, so far as they relate to the conduct of business at meetings of the Commissioners, shall apply generally to Committee meetings.

The penalty for infringement shall be a fine not exceeding Rs. 20.

12. No person shall in any way obstruct, or cause to be obstructed, any of the roads, lanes or other thoroughfares in any bazar or elsewhere, by exposing for sale or accumulating anything on such road, lane or thoroughfare.

The penalty for infringement shall be a fine not exceeding Rs. 10.

13. No person shall allow bullocks or any other animals to stray into any road, lane or thoroughfare.

14. No person shall construct or place over or by the side of any public drain any bridge, platform, or building or structure of any kind, except by and with the written permission of the Commissioners, and in such manner as they shall direct.

The penalty for infringement shall be a fine not exceeding Rs. 10. The penalty for continued infringement shall be a fine not exceeding Rs. 2 daily.

15. The Commissioners may give notice in writing to the owner of any trees or shrubs overhanging any public tank, and liable to foul the water thereof, to cut or trim the same in such a manner as the Commissioners shall direct. Whoever fails to comply with such requisition shall be liable to a fine not exceeding Rs. 10, and to a daily fine not exceeding Rs. 2, until such requisition be complied with.

16. No person shall wash any clothes belonging to a person suffering from contagious or infectious diseases, such as cholera, small-pox, typhoid fever, &c., in any tank or water-course within the limits of the municipality.

The penalty for infringement shall be a fine not exceeding Rs. 20; for continued infringement, a fine not exceeding Rs. 5 daily.

17. No person shall perform any office of nature in any place outside the private premises other than in such places as may have been appointed by the Commissioners.

The penalty for infringement shall be a fine not exceeding Rs. 10.

18. No person shall foul any water used by the public for drinking or bathing purposes by allowing leaves of any trees, bamboos, or any rank vegetation to rot in it in such a way as to be injurious to the health of the public.

The penalty for infringement shall be a fine not exceeding Rs. 10.

19. No person shall tether or picket any animal on or by the side of any public road or drain.

The penalty for infringement shall be a fine not exceeding Rs. 10.

20. No person shall cut sods or grass or remove earth or grass from the margin of any public road or from any drain.

The penalty for infringement shall be a fine not exceeding Rs. 10.

21. No person shall deposit earth or other substances in or make any alterations whatever in any public drain without the permission of the Commissioners.

The penalty for infringement shall be a fine not exceeding Rs. 10.

22. No person shall bury, or cause to be buried, any corpse in any burial ground in a grave constructed of masonry in such manner that the top of the coffin, or the body when no coffin is used, shall be at a less depth than five feet from the surface of the ground.

The penalty for infringement shall be a fine not exceeding Rs. 20.

23. No person shall bury or cause to be buried, in a burial-ground any corpse in any grave not constructed of masonry, which shall be less than six feet deep.

The penalty for infringement shall be a fine not exceeding Rs. 10.

24. No person shall build or dig, or cause to be built or dug, any grave in a burial-ground at a less distance than two feet from any other existing grave.

The penalty for infringement shall be a fine not exceeding Rs. 20.

25. No grave once used shall be opened for the burial of another body without the permission of the Commissioners.

The penalty for infringement shall be a fine not exceeding Rs. 20.

26. No person when burning, or causing to be burnt, any corpse or part of a corpse in any burning-ground shall permit the same to remain without being completely reduced to ashes, or shall permit the clothes or other articles connected with the burning of such corpse to remain at or near such burning-ground, unless the same be completely reduced to ashes.

The penalty for infringement shall be a fine not exceeding Rs. 20.

27. No person shall carry a corpse, or part of a corpse, through any highway, unless it be decently covered and totally concealed from view.

The penalty for infringement shall be a fine not exceeding Rs. 20.

28. No person while conveying a corpse, or part of a corpse, shall, except for the purpose of ordinary relief, deposit it on or near any public highway.

The penalty for infringement shall be a fine not exceeding Rs. 20.

NOTICE is hereby given that the undermentioned plots of Nalhati Railway land, no longer required by the Government, situated in the district of Moorshedabad, will be put up to sale on the 21st September next, in Moorshedabad Collector's Office.

The purchasers of the plots will be subject to the following conditions:—

1st.—The purchasers will have no power to make any excavation on the land nearer than 15 feet from the Railway fencing, or plough it closer than 3 feet from its foundation.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid down at once.

3rd.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled, the sum deposited being forfeited to Government, and the estate to be again put up for sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale.

4th.—The plots will be sold revenue-free to the highest bidders.

5th.—The purchaser shall be put in possession on receipt of the orders of the Collector approving of the sales. But such possession shall be liable to be disturbed in case the final confirmation of the Board of Revenue should not be accorded to the proceedings.

Patna Collector's Office, dated Bankipore, the 27th June 1888.

C. QUINN, Collector.

NOTICE is hereby given that the undermentioned plots of land which are no longer required by Government for the purpose for which they were acquired will be put up to auction at the Shahabad Collectorate, on the 14th of August 1888, and will be sold to the highest bidders on the conditions specified below:—

(a). On the termination of the sale the auction purchaser will be required to deposit a sum equal to one-fourth of the purchase money, failing which the land will be resold immediately.

(b). Within a period of 30 days from the date of sale, the auction purchaser must pay the entire amount due from him on account of the sale; in the event of his failing to pay in the money within the prescribed time, the deposit of one-fourth money will be forfeited by him and the land resold.

(c). If the price obtained by the second sale falls short of that offered in the original sale, the first auction purchaser will be required to make good the difference.—

## The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st April 1888, the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series, including postage, Rs. 22-8.

Without postage. With postage.

For the Calcutta Series ...	Rs. 10 0	Rs. 12 8

Bills introduced into the Council of the Governor General for making  
Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

### LEGISLATIVE DEPARTMENT.

The following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 11th July, 1888:

NO. 5 OF 1888.

*A Bill to remove doubts as to the legality of the levy of certain Tolls.*

WHEREAS doubts have been raised as to the operation of the Acts of the Governor-General in Council, No. VIII. of 1851 (*an Act for enabling Government to levy Tolls on Public Roads and Bridges*) and No. XV. of 1864 (*an Act to amend Act VIII. of 1851*); It is hereby enacted as follows:—

1. Acts VIII. of 1851 and XV. of 1864 shall be deemed to be in force throughout the territories now administered by the Lieutenant-Governor of the Punjab, and, from the twenty-first day of August, 1857, and the twenty-fourth day of March, 1864, respectively, to have been in force in the territories for the time being administered as part of the Punjab.

2. (1) In any part of British India beyond the limits of the territories administered by the Governor of Fort St. George in Council and the Lieutenant-Governors of Bengal and the North-

Western Provinces, to or in which Acts VIII. of 1851 and XV. of 1864 may be or have been extended, or may be or have been declared to be in force, under the latter of those Acts or by this Act or by or under any other enactment, the Local Government shall be deemed to have and, where the Acts have been in force before the passing of this Act, to have had the same authority as if it had been included among the Local Governments specified in section 2 of Act VIII. of 1851.

(2) "Presidency", where that word occurs in section 8 of Act VIII. of 1851, shall be deemed to mean, and to have meant, the territories under the administration of a Local Government.

3. All tolls levied, or purporting to have been levied, under Acts VIII. of 1851 and XV. of 1864, or either of those Acts, before the passing of this Act, shall be deemed to have been lawfully levied.

4. Nothing in the foregoing sections shall affect any proceedings commenced in any Civil Court before the first day of July, 1888.

5. In section 2 of Act VIII. of 1851 the words "and the Governor of the Presidency of Bombay in Council" are hereby repealed, and the word "and" shall be inserted between the words "the Lieutenant-Governor of the North-Western Provinces of Bengal" and the words "the Governor of the Presidency of Fort St. George in Council".

Amendment of section 2, Act VIII., 1851.

[Bom. Act of 1875, n.

## STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is to remove doubts as to the operation of Acts VIII. of 1851 and XV. of 1864 in the Punjab, and to validate the levy of tolls in that Province under those Acts.

The introduction of a Bill being expedient for those purposes, the opportunity has been taken to confer in express terms on the Lieutenant-Governor of the Punjab and the Chief Commissioners of Burma, the Central Provinces and Coorg, and on the Local Government of any other province in which the Acts may for the time being be in force, the authority which is conferred on the Governor of Fort St. George in Council and the Lieutenant-Governors of Bengal and the North-Western Provinces by section 2 of the Act of 1851, and to declare the word "Presidency" in section 8 of that Act to mean the territories under the administration of a Local Government.

### RESOLUTION ON THE REPORT ON INLAND EMIGRATION FOR THE YEAR 1887.

#### GENERAL DEPARTMENT.—INLAND EMIGRATION.

*Calcutta, the 12th July 1888.*

#### RESOLUTION.

READ—

The Report on Inland Emigration for the year 1887.

The Report has been submitted with punctuality by Dr. Grant, who continued to be in charge of the office of Protector of Emigrants throughout the year, while Dr. Chandra was again the Medical Inspector in Calcutta, and Dr. Vincent Richards held the dual appointment of Embarkation Agent and Medical Inspector at Goalundo.

2. The only administrative change of importance which occurred was the revision of the form of way-bills for contractors and sardari emigrants, so as to dispense with the inspection formerly insisted upon at Mugra, but rendered unnecessary by the opening of the Hooghly Bridge and the consequent uninterrupted passage of emigrants from the East Indian to the Eastern Bengal line. It is reported also that the removal of the terminus of the latter Railway from Goalundo to Rajbaree, necessitated by the rapid erosion of the riverbank, led to a corresponding transfer of arrangements for the embarkation of emigrants.

3. The principal feature in the report is the great increase shown in the emigration of labourers recruited without reference to the Act. These are called free emigrants, though, as they are conveyed in large batches at the cost of contractors and execute labour contracts at Dhubri on their entering into Assam, their actual position during the journey and their eventual legal position are the same as that of the labourers whose recruiting and whose journey are supervised by Government. The number of these free emigrants to Assam was 21,851, as against 13,134 in the preceding year, and there was also considerable emigration to Cachar and Sylhet, as to the extent of which the Protector can supply no information. A virulent outbreak of cholera, which occurred since the close of the year among coolies travelling by the line most frequented by these unregistered emigrants, has led to suggestions, now under consideration, for the sanitary supervision of all coolie traffic to Assam. It appears that in regard to the circumstances under which they are collected, detained in depôts, and forwarded to Assam, there is no distinction whatever between free coolies and others; so that the necessity for sanitary control is the same in respect of the two classes of emigrants.

4. Two agencies are employed for recruiting under the Act—that of licensed contractors, and that of garden-sardars authorised by the employers of labour. The former recruited 2,945 labourers, as against 2,924 in 1886; the latter 6,748 as against 10,124. From these figures it would appear that the unlicensed recruiting referred to in the last paragraph, having almost superseded the work of the contractors, is now rapidly ousting that of the garden-sardars. It is observed with satisfaction that only one license, a recruiter's, had to be cancelled on account of the holder's misconduct. Ten sardarnis were employed in recruiting females, and these are said to have, as far as is known, worked satisfactorily.

5. From the statement showing the districts of registration and of residence of emigrants, it appears that the 24-Pergunnahs and Burdwan in Bengal, and Shahabad in Behar, are the largest recruiting grounds, and that the proportion of emigrants who were natives of the districts in which they were registered, was largest in Hazaribagh and Bancoorah, and smallest, as usual, in the 24-Pergunnahs and Burdwan, where registration was most active. Dr. Grant has supplied no illustrative maps of the kind recently suggested by Government, and it is explained that the omission was due to his ill-health and hurried departure from India on sick leave. In this instance, however, a map based on the statements referred to would be of comparatively little value, as the figures apply only to the small body of coolies recruited through contractors.

6. The aggregate number of contractors' emigrants and their dependents was reduced, prior to arrival at Calcutta, by the low percentage of 1·70, there being no deaths, and the results at this stage comparing favourably with those of the preceding year. The percentages of rejections and discharges fell from 4·3 to 2·3 and from 6·56 to 6·10 respectively, but that of desertions rose from 8·52 to 14·66, an increase which is said to have been due for the most part to a large number of coolies absconding, in their impatience for work, from one of the depôts on the decline of the business of a contractor, who had subsequently to retire from the field altogether.

7. The depôts are reported to have been maintained throughout the year in a condition favourable to the health of their inmates, and no overcrowding occurred. The food provided for the coolies was sufficient, wholesome, and well cooked, while the hospitals were properly maintained, and the supply of drugs and other necessaries was adequate. All the coolies received into the depôts were vaccinated, none being allowed to proceed to the labour districts except after successful subjection to the operation, and the general health of the depôt population contrasted favourably with that of 1886, itself a healthy year, the death-rate showing a reduction from 2·4 to 1·3 per mille of the total number of admissions. It was pointed out in the Resolution upon last year's report that the number of rejections, although small, might be still further reduced if greater strictness were observed in the medical inspection of emigrants prior to their despatch from the recruiting districts, and the satisfactory decrease

only two deaths, one of which was due to cholera, occurred; and the general accommodation, water-supply and sanitary arrangements during the voyage are shown by the remarks of inspecting officers on the way-bills to have been satisfactory. The mortality among coolies during the voyage to Cachar and Sylhet, generally made in country boats, was less than in 1886: but the number of desertions was much larger, the latter result being ascribed in some measure to the circumstance that emigrants in boats have to stop at Naraingunge, where they are said to be enticed away, or induced to abscond and take employment in the jute mills of that place. The remarks in this paragraph refer only to the comparatively small proportion of emigrants making contracts under the Act in the districts of recruitment, as those who execute contracts at Dhubri, forming the greater part of the whole supply of articulated coolies, are not subject to sanitary supervision while in Bengal.

8. Particulars of the journeys of sardari emigrants are again incomplete, only 2,280 of a total of 2,802, whose contracts for Sylhet and Cachar were registered in the recruiting districts, having been accounted for by the receipt of 298 batches of way-bills, and no information being available regarding the remaining 522. The percentage of total casualties in 1887, as far as can be judged, was 7·19 against 6·77 in 1886, and this excess occurs exclusively in the number "left behind." It is, as the Protector remarks, much to be regretted that the way-bills are not carefully filled in at each of the inspecting stations.

9. The Lieutenant-Governor has to acknowledge Dr. Grant's efficient administration of the Department during the year under report.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

**ADMINISTRATION REPORT OF THE METEOROLOGICAL  
DEPARTMENT, 1887-88.**

---

The following report is published for general information.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPT.,  
*The 16th July, 1888.*

P. NOLAN,  
*Secretary to the Government of Bengal.*

IN connection with the discussion of the desirability of generally shortening the Administration Reports of the Departments of Government, it has been decided that in future the Meteorological Reporter is to submit for two years only brief accounts of the principal points in connection with the administration of his Department, while every third year he is to prepare full, detailed and comprehensive reports for the three yearly periods. The present report may therefore be taken to be the first of the triennial series, and only the more important changes in the history of the Bengal Meteorological Department during the year 1887-88 will be touched upon, and all descriptions as to the working of the individual observatories, &c, under the control of the Meteorological Reporter, and similar details will be held over till the preparation of the report for 1889-90.

The Department was at the commencement of the official year under the control of the permanent head of the Department, Mr. John Eliot; but on his appointment to act as Officiating Meteorological Reporter to the Government of India, the Department was entrusted to my care, and I have remained in charge up to the close of the official year.

The largest amount of change in the work of the Department introduced during the year under review has been in the storm warning signal service.

The official position which the Meteorological Reporter occupied previously with respect to issuing warnings of the formation and approach of storms was that he was expected specially to give notice of the occurrence of storms in the Bay, which were likely to affect the ports of Calcutta and Chittagong, while he was also to give general information as to the existence of storms in the Bay. As a matter of fact, however, the Bengal Meteorological Reporter has for some years made it a practice to telegraph warnings of the existence of severe storms in the Bay to the various ports which were likely to be affected by the storm, but such warnings had no official status, and it rested entirely with the discretion of the officials at the ports warned, whether they made any use of the information supplied to them or not. On the other hand, also, the Bengal Reporter had never been empowered to issue such warnings to any ports, except those above named, and it was purely discretionary on his part to take up this extra work.

Storm signals were indeed only supplied to the ports of Calcutta and Chittagong and to the Telegraph stations in the river approaches to Calcutta. The signals used differed largely in complexity, and in the amount of information which could be afforded by them. At the stations in the river approaches to Calcutta it was possible for the Meteorological Reporter by means of appropriate signals to warn the shipping proceeding up or down the river of the size and intensity of a storm in the Bay, and of the probable position in which the storm would reach the coast. These signals were, however, not allowed by the port authorities to be displayed in Calcutta, and only a small code of signals was provided for the port of Calcutta, notifying the actual existence of or the approach to the port of Calcutta, and very fierce cyclones. It had thus happened on several previous occasions that after ships had left their safe anchorages in the port, and were proceeding down the river, they were met with the display of storm signals giving them information of the existence of stormy weather, which rendered it undesirable for them to proceed to sea. In other words ships were allowed to leave the Port and to proceed some distance towards the danger without being apprized of it, when the information could equally

of Chittagong, a very simple code of two day and two night signals was employed, one a warning signal and the other a danger signal of similar nature to those used generally in such cases.

This condition of the storm warning service has, however, been completely changed during the year 1887-88. By a notification issued on the 4th of August 1887, the use of the comprehensive system of signals, which was devised by Mr. Eliot, and which signals were formerly only able to be hoisted in the river approaches to Calcutta, has been extended to the port of Calcutta itself. For the future full information of the formation and course of all important cyclonic storms, whether large or small, can be communicated to the shipping lying in the port of Calcutta, and also in the same way to the inhabitants of the town. The opportunity of the issue of a new notification was also taken to alter the meaning of one of the signals, and a *bad weather preparatory signal* has been introduced, the meaning of which is that a cyclonic storm of undetermined intensity and magnitude has formed in the Bay, but which is too far distant to enable its line of advance to be determined. By a second notification issued on the same day the duties of the Meteorological Reporter were extended to the warning of the Orissa Ports (Pooree, False Point, Balasore, and Chandbally) of the existence of storms, and of ordering the hoisting of the storm signals at those ports. By the third notification issued on the same day the duty of the Meteorological Reporter in warning the port of Chittagong of the existence and approach of storms and of ordering the hoisting of the signals was again officially recognized, and at the same time the opportunity was taken of amending the wording and meaning of the signals. The signals used in the case of the Orissa ports and at Chittagong are similar to those formerly used at Chittagong, *i.e.*, there are two day and two night signals, the first being the warning and the second the danger signal. It will thus be seen that the Bengal Reporter is charged with the duty of actually ordering the hoisting of the storm signals at all the ports on the coasts of Bengal.

With the permission of the Governments of India and Bengal, the Governments of Madras and of Burmah also issued orders and notifications by which the Bengal Reporter was charged with the duty of giving information of the existence of storms to the ports on these coasts. Owing, however, to certain misunderstandings, the systems adopted by the two Governments differed from each other, and also differed from that sanctioned in Bengal, and in certain cases the Bengal Reporter was asked to undertake responsibilities which were very undesirable. In order to bring about more uniformity in the system of issuing storm warnings, Mr. Eliot, Officiating Meteorological Reporter to the Government of India, visited both Madras and Burmah, and an uniform method of conveying warnings has been arranged by which the Bengal Reporter has to give full information of the formation, growth and line of march of cyclonic storms in the Bay to the Port Officers of the Ports likely to be affected, either direct or through certain selected Port Officers, but the Reporter is not charged with the duty of actually ordering the hoisting of the storm signals, and the Port Officers will utilize the meteorological information conveyed to them in conjunction with their knowledge of local conditions, and the circumstances of the ports, &c., in deciding when it is necessary to hoist the warning or the danger signals and when to lower them. The regulations for working the Burmah and Madras storm signals, which are very clear and precise, were arranged at the close of the official year, and the actual orders of the Meteorological Reporter to the Government of India communicating these revised regulations were received on 5th April 1888.

It will thus be seen that the arrangements for working the storm signal service are now complete, and the Bengal Reporter has to warn all ports from Tavoy in the south of Burmah round the whole Bay down to Tuticorin in the extreme south of the Madras Presidency, or roughly he has to warn a coast line about 2,400 miles in length. The work of the Bengal Reporter has therefore been increased very decidedly, and the responsibility of his work under these new arrangements is very great indeed.

In many respects the arrangements for working the storm signals in Burmah and Madras are more satisfactory than those in the case of the Bengal ports, including Calcutta. In the case of the signals used in Calcutta and the river

addition to the meteorological information which they convey.

they are in many cases actual orders to shipping, and it does not appear desirable to make the Meteorological Reporter responsible for giving advice as to whether a ship should or should not be allowed to go to sea when he is extremely ignorant of the capabilities of the various kinds of ships in meeting heavy weather, and as he is quite ignorant of the peculiarities of the river Hooghly, both of which would be important factors in advising in any case. Further, in issuing orders for hoisting storm signals in the other ports he is completely in ignorance of what the signals are intended to protect, for at such a place as False Point the signals might be intended to give warnings to large steamers such as those of the British India Company, while at other ports small steamers, country boats, &c., might only be in harbour, which would be unable to withstand a gale perhaps only a fifth as strong as in the former case. Again the Reporter is perfectly ignorant of the local peculiarities of all the outports. The position which the Bengal Reporter takes up in this matter has been brought to the notice of Government during the past year in several communications. The Port Commissioners and the Port Officer of Calcutta were also consulted in the matter, but they are averse to any change being made in the present system of issuing warnings and hoisting the storm signals, and this responsibility thus still rests with the Reporter.

In order to render the information at the disposal of the Bengal Reporter for working the storm warning system as complete as possible under existing circumstances, sanction was accorded by the Government of India to the inclusion of a larger number of reporting stations in those sending telegraphic information to Calcutta for the daily report. In this way the observations from the meteorological stations at Rangoon, Moulmein and Bassein are now being included, and sanction was also accorded to the establishment of five new observatories for inclusion in the system. Of these five, the Tavoy observatory in South Burmah was established in March 1888, and is now sending daily telegrams. An observatory at Pooree on the Orissa coast was established before the close of the official year, but there has been a little delay in establishing the three new stations on the Madras coast at Nellore, Cuddalore and Bimlipatam, but steps have been taken to establish them as soon as possible. The cost of this extension of the storm signal service is Rs. 12,500 annually, but almost the whole of this sum (about nine-tenths) is simply for the cost of telegrams. When these new stations are thoroughly started, the information at the disposal of the Bengal Reporter will be fairly complete, though so long as there is no telegraphic communication with the Andaman Islands, and it is thus impossible to obtain meteorological observations from that place, the most important area in connection with the generation of cyclones or what is sometimes called the birthplace of cyclones remains entirely unrepresented. The subject of connecting the Andaman Islands by telegraph with the main land was prominently brought forward during the year under review in connection with the generation of the Balasore cyclone, but hitherto it has been impossible to secure this most desirable result.

In connection also with the generation of cyclones in the extreme south of the Bay, and from which area storms usually advance towards the South Madras coast, the meteorological station at Nancowry in the Nicobar Islands would be a very valuable addition to the present list of stations; but here again there is the difficulty that there is no telegraphic communication between these islands and the main land.

Lastly, in connection with the advance of cyclones towards the north-west angle of the Bay, and towards the mouth of the Hooghly, by far the most important station to enable early warning of the precise intensity of a storm to be given to the port of Calcutta would be the Eastern Channel Light ship; and if it were possible to connect this observing station with Saugor Island by telegraph, it would enable *certain* information of the intensity of storms at the head of the Bay to be communicated to the port of Calcutta at least six hours earlier than is possible under existing circumstances.

In the future developments of the storm signal service the connection of the Andaman Islands, the connection of the Eastern Channel Light ship, and of the Nicobars by telegraph with the main land should be steadily kept in view.

previous annual reports that next in importance to

of cyclones, the Diamond Island Observatory gives the most important observations, and it has been regretted that on numerous occasions the Diamond Island telegraph line has become interrupted just at the most critical periods. The cause of the interruption has been ascertained to be due to no fault of the officials in charge, but that the telegraph line passes through a narrow belt of cleared forest in joining with the main system of telegraphic communication, and thus at the very commencement of stormy weather trees were blown down or branches broken off, which falling on the line destroyed the communication, as stated previously, at the precise period when its observations became of great value. This fact was once more brought into prominence in the history of the Balasore cyclone, when again this line became interrupted, and the Government of India has since decided to widen the belt of cleared forest through which the line passes at a cost of Rs. 19,500, and thus it is to be hoped that in future there will be no fear of interruption in this important part of the service.

As it is of the utmost importance that information of the approach of, or even of the existence of, stormy weather, should be conveyed to ports with the least possible delay, the Director-General of Telegraphs has arranged that when it is necessary for the Meteorological Reporter to issue orders directing the hoisting of storm-signals, or when it is necessary for him to call for additional observations to enable him to decide on the nature and track of a storm, he shall have power to issue or call for precedence telegrams, which shall rank before ordinary urgent telegrams in priority of despatch. This is, however, only one of the many ways in which the Meteorological Department is indebted to the Telegraph Department.

In order also to facilitate the receipt of the weather messages, and thus to enable the reports of this Department to be issued, or the necessary action in the matter of issuing storm-warnings to be undertaken with the least possible delay, a change has been introduced in the method of receiving the messages in this office.

Hitherto the method of receiving telegrams in the Meteorological Office direct from the Central Telegraph office has been by what is called the ABC instrument. This method of telegraphing is admittedly very slow, and the instrument frequently gets out of order. With a view to obviate this, an additional clerk, who was taken on at the time of the extension of the storm signal service, was selected for his knowledge of the system of Morse telegraphy, and also five of the clerks of this office have since been trained in the same system, and there is now no difficulty in receiving the meteorological telegrams in this office by this method, which is undoubtedly the most rapid system known. By this means the weather reports can be prepared and issued much earlier than was formerly the case, and the telegrams for the Bay of Bengal Daily Weather Report are now received, the observations reduced, charted, &c., and the report written and printed off about two and-a-half to three hours after the observations are actually made, instead of about five hours after as was the case in former years. A great part of this acceleration is also due to the very rapid manner in which the telegrams are now sent in by the Telegraph Department, and I have to thank Mr. Blissett, Chief Superintendent of Telegraphs, Bengal Division, for the very great help this Department has received at his hands, both in the acceleration of the telegraphic work generally and in the matter of training the clerks in telegraphy.

Another point of importance in connection with the issue of the Bay of Bengal Daily Weather Report is to be introduced at the commencement of the next official year, or on 1st April 1888. The time at which the observations are made is to be changed from 10 A.M. as in former years to 8 A.M., and the experiment is at present ordered to last till the end of 1888. The 10 A.M. observations are also being continued at all the Bengal stations which telegraph daily for the report, and the funds for the payment of the extra observations have been supplied by the Meteorological Reporter for India, who will subsequently decide as to which hour of observation should be continued for the future. The change in the hour of observations, together with the acceleration in the service previously mentioned, will now enable me to commence the issue of the printed report daily at about 10-45 A.M. instead of at 3-30 or 4 P.M., as has been the case in former years. The advantages of the

acceleration are obvious. Storm warnings, if necessary, can be issued early in the day or about 9 or 10 o'clock directly the 8 A.M. telegrams are received. Also the weather report will be in the hands of the port authorities, the masters of ships, shipowners, and others interested in the weather and shipping early in the business day instead of at its close as was formerly the case.

In connection with the storm signal service it must be also mentioned that during the formation and existence of the Balasore cyclone warnings of its formation and line of march were issued widely to all the principal ports round the Bay, and on its approach towards the head of the Bay storm-signals were displayed in the river approaches from 8-25 A.M. of 25th May to 7 A.M. of the 27th May. Detailed reports have been submitted during the year as to the action taken by me during the Balasore cyclone, and therefore the matter need not again be detailed here. The Balasore cyclone was an extremely fierce one, and a history of its formation, &c., has been prepared by Mr. Eliot, Officiating Meteorological Reporter for India, and published as Part I of the Cyclone Memoirs. The second occasion on which the signals were hoisted in the river was from 1 P.M. of the 12th June to 12-30 P.M. of the 13th, during the advance of another cyclonic storm to the Orissa coast. In addition to these two storms there were very numerous rainy season whirls or smaller cyclonic storms. These, however, will only be described in the usual meteorological summary for the year, which is prepared later on, and no description of the cyclonic storms formed in the Bay will appear in the Administration Report.

The above represents a short summary of the principal changes which have been introduced in the working of the Department during the year, and, generally speaking, in other respects the system of work which has obtained in former years has been maintained.

The following was the number of stations reporting observations to this Department during 1887-88 :—

1st class Imperial observatory ...	...	...	...	1
2nd " " observatories	...	...	...	2
3rd " " " "	...	...	...	21
3rd " Provincial " "	...	...	...	28
Other stations reporting for the storm-warning service only	...	...	...	10
4th class stations or stations, where records of rainfall only are made	...	...	...	250

Compared with the previous year these numbers show the following additions :—

3rd class Provincial observatories	...	...	...	2
Rainfall station ...	...	...	...	1

Of these stations the following were the numbers inspected during the year :—

2nd class observatory	...	...	...	1
3rd " observatories	...	...	...	28

and the majority of the stations with a few bad exceptions were found in good order. Of those inspected, the observatories at Julpaiguri, Malda and Purneah were in decidedly bad order, while of the other observatories the records submitted from Tezporé were valueless, being full of errors, and this observatory is perhaps the worst in the whole system.

Some changes have been introduced during the year in the work of some of the observatories by order of the Meteorological Reporter to the Government of India. Thus the synoptic observations taken at Patna, Chittagong, Sib-sagar, Dhubri, Hazaribagh, and Cuttack in connection with the international reports of the United States Signal Service have been stopped. The use of the solar radiation and grass radiation thermometers at all the observatories previously using them in Bengal has been discontinued except at Dhubri, Darjeeling, and Silchar. On the other hand, special extra observations have been ordered to be made during the current year at Dhubri to enable this station to complete the required amount of records as a second class observatory, and at the end of 1888-89 this station will be reduced to one of the third class; and lastly, the special allowances for meritorious service which were previously drawn by several observers in Bengal, have been stopped, as the Government of India has withdrawn the whole of these allowances, as they do not appear to have brought about the general improvement of the observations which it was

In the office establishment there have been no radical changes during the year, and there has only been the addition of one clerk which was necessary in connection with the extension of the storm signal service. The whole office establishment has worked most satisfactorily throughout the year, and the various daily, weekly, monthly, and special reports with maps, etc., have been published regularly and submitted up to date throughout the year without break of any kind.

The following statement gives the expenditure on account of the Bengal Meteorological Department during the year 1887-88 as kept in the books of this office, together with the sanctioned grants under each head :—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h. 10h. 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

Calcutta, the 17th July 1888.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS  
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS  
TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 13th OF  
JULY 1888.**

DURING the previous week ordinary monsoon conditions had prevailed for the greater part of the time over the province, though a distinct barometric depression had passed through the western districts. Thus heavy rain had been received in all districts except Orissa, and the falls over a considerable area had been nearly twice as large as the normal. At the commencement of the present week conditions continued of ordinary monsoon character, and for the first three or four days no change of any importance occurred. On the morning of the 10th, however, the observations generally showed that the monsoon current blowing at the head of the Bay was falling off in strength, though conditions still fairly were normal. On the 11th a rather rapid fall of pressure took place across the centre of the Bay, and winds began to show a slight tendency to cyclonic circulation over the same area. On the morning of the 12th these conditions had developed into a decided barometric depression accompanied by a well-marked cyclonic circulation of winds, though the velocities registered at the coast stations were small. On the morning of this day the centre of the small storm was probably at considerable distance from land and about south-east of Gopalpore. On the morning of the 12th all the ports on the west coast from Balasore down to Cocanada were warned of the existence of the storm in the Bay. During the evening of the 12th the observations received indicated that the storm had intensified slightly, and that it was approaching the land in the direction of the South Orissa coast, and at 4 A.M. on the morning of the 13th the appropriate storm signals were hoisted in the port of Calcutta and in the river Hooghly, signifying that the storm would cross the coast to the south of False Point. The ports on the west coast were also warned of the movement of the storm at the same time. At 8 A.M. of the 13th the centre of the small storm was approaching the coast between Pooree and Gopalpore, and during the evening and night of the same day the centre crossed the coast between these two stations. Between midnight and one o'clock in the morning of the 14th, the ports on the west coast were again informed that the storm was passing inland, and the storm signals in the river and the port of Calcutta were lowered.

At no time did the storm appear to be a very fierce one as judged by the wind velocities or by the fall in the barometric pressure at the coast stations, though a most complete cyclonic circulation of winds accompanied the storm, but at sea rather bad weather undoubtedly existed. The log of the *City of Cambridge* has been kindly placed at the disposal of the Meteorological Office by Captain Thoms, and this steamer in her course from Ceylon to Calcutta passed through the south-east and east of the storm area, but probably at some considerable distance from its centre. The following are some portions of the description of the weather experienced by this vessel in her passage up the Bay :—On the 12th July.—“Very high sea getting up. Fierce squalls. Sea very heavy. 13th July.—Heavy gale with fierce squalls, very heavy sea, and later on wind and sea moderating. 14th July.—Hard squalls. Heavy sea. 8 P.M. arrived at Saugor.” It is therefore evident that the small storm was decidedly fierce at sea, though as it passed over the land it appeared to be comparatively feeble.

During the formation and existence of the small storm, as is usually the case, the rain-bearing winds were deflected from Bengal by the cyclonic circulation which had been set up, and rainfall was probably heavy over the sea area, and it was hence light over the large part of the province. For the latter half of the week, therefore, rainfall was generally not so heavy as in the earlier part, and thus rainfall for the week over the province has been considerably smaller than probably it otherwise would have been.

**Pressure.**—The pressure variations during the week have, as before described, been partly dependent on the formation and advance of the small storm in the Bay, and thus the mean pressures for the week at the Orissa stations generally show a very distinct defect. At False Point the defect has equalled 0.049 inch, and at Cuttack 0.042 inch. In other districts of the province the defects of the mean pressures from the normal have either been very small, or in some cases in the east and north of the province, pressure has even been slightly in excess of the normal. For the whole of Bengal the mean pressure for the week has been 0.012 inch in defect of the normal. In Assam, on the other hand, the average pressure has been in excess by 0.006 inch.

**Temperature.**—The variations of temperature during the week have been of very little importance. For the whole province the mean temperature for the week has been 0.4° in excess of the normal; the largest excess registered is 1.0° in Orissa, where again rainfall has been scanty. On the other hand, temperature in Assam has been 0.7° below the normal.

**Rainfall.**—Has been moderate only throughout the week; the heaviest falls have occurred in North Bengal, the stations in which have averaged nearly three inches of rain. In South-West Bengal, East Bengal, North and South Behar, and in Chutia Nagpur the falls have averaged from one and a half to two inches; while in Orissa the fall has only equalled about an inch. The fall in North Bengal has been equal to about 90 per cent. of the usual fall for the period; in South Behar it has equalled 73 per cent.; in South-West Bengal and North Behar 59 per cent.; in Chutia Nagpur 52 per cent.; in East Bengal 48 per cent.; and in Orissa 36 per cent. Speaking roughly, therefore, the fall of the whole province has equalled about 60 per cent. of the normal.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the week ending Friday, the 13th of July 1888 :—

The mean temperature of the seven days

The extreme variation of temperature

The maximum temperature

The mean relative humidity

The total fall of rain from 8th to 14th July 1888

The mean temperature and humidity are obtained by applying to the mean of the 10h, 16h, and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

MEMORANDUM.

THE birth and death returns of the principal Municipalities in Bengal furnish the following results for the week ending 30th June 1888 :—

1. That the birth-rate in these Municipalities amounted to 17·6 per 1,000 of population as opposed to 16·8 per 1,000 in the preceding week ending 23rd June, and the death-rate to 24·2 per 1,000 against the same ratio.

2. That the following Municipalities returned the highest proportions of births and deaths :—

<i>Births.</i>			<i>Deaths.</i>		
		Ratio per mille.			Ratio per mille.
Monghyr	...	34·4	Gya		60·8
Darjiling	...	32·6	Comillah		46·2
Burdwan	...	30·5	Darjiling		45·8
			Burdwan		32·0
			Bhagulpore		29·8

3. That in comparison with the results of the preceding week, there were no marked differences in the casualty-rates from any of the diseases specified in the following table :—

	Ratio per mille during the weeks ending—	
	30th June 1888.	23rd June 1888.

*Comparative statement of the principal commodities carried over the Bengal Central Railway during the month of April 1888.*

INCREASES.							Tons.
Coal ... ..							867
From the East Indian Railway for railway and flotilla purposes, and also for brick-burning at Habra.							
Rice ... ..							149
A good market. The despatches are principally from Khoolna, Nowapara, and Singhin.							
Jute, unscrawed ... ..							40
Principally from Khulna, due to jute brought from Serajganj in boats being transferred to railway on account of Caky condition of boats.							
Oil-seeds ... ..							265
Steady market in Calcutta.							
Other provisions ... ..							92
Increased demand.							
The increases under other heads are small and do not call for any special remarks.							
DECREASES.							
Edible grains and pulses other than rice, wheat, bajra and gram							838
Principally from Surchia and Khulna, due in the case of the former station to larger despatches being made by boats, and in the latter to the Alaipur canal being blocked. Dullness of market was the chief reason.							
Betel-nuts ... ..							101
Principally from Khulna, due to closure of Alaipur canal; hence no despatches were received during the month from Bengal Central flotilla stations.							
Railway plant ... ..							511
Reduced requirement for construction and maintenance purposes.							
Sugar ... ..							340
Dullness of market. Reduced despatches from Gobardanga and Jhikergacha.							
All other articles of merchandise ... ..							146
No demand.							

Calcutta, the 12th July 1888.

## RESOLUTION ON THE GENERAL ADMINISTRATION REPORT OF THE BHAGULPORE DIVISION FOR THE YEAR 1887-88.

### GENERAL DEPARTMENT,—MISCELLANEOUS.

*Calcutta, the 24th July 1888.*

#### READ—

The Annual General Report of the Bhagulpore Division for the year 1887-88.

MR. ALEXANDER was in charge of the Division up to the 15th August, and Mr. Beames for the remainder of the year. The Annual Report is submitted by Mr. Beames. It is meagre and less interesting than Mr. Beames might have made it.

2. *Annual tours.*—All the District and Sub-divisional Officers were a sufficient number of days on tour.

3. *Crops, Public Health, and Material condition of the people.*—In Maldah the crops were good: elsewhere they were somewhat below the average. Public health also was bad; and cholera and fever were prevalent. There was a decrease in small-pox owing to the spread of vaccination, which is steadily gaining ground in the confidence of the people. The material condition of the people is said to have improved owing principally to a succession of good crops in previous years. The Collector of Bhagulpore observes:—

“As usual, I have to notice the weavers as worst off among artisans. and

have done a good business, and every year the Marwari seems to me to be getting a greater hold on the district. They are the most prosperous class in all the large towns. The smaller landlords of the district are, I fear, as deeply indebted, in proportion to their numbers, as are their ryots, and a few too of the large zemindars are much involved."

4. *Emigration.*—While there is a considerable decrease in registered emigration, what is called free emigration is increasing. The Deputy Commissioner of the Sonthal Pergunnahs again strongly complains of the great mischief done under the free recruiting system. Four cases of abduction have come before him for trial under his special powers. What he describes as a crimping system appears to be in full force. Men and women are, he declares, sold for Assam and Cachar without being in any proper sense of the term free agents.

These very serious charges have already been under the Lieutenant-Governor's consideration. Instead of a real system of free labour, there is too much reason to believe that the Act (I of 1882) has had the effect of bringing about a state of things far worse than that which it was intended to supersede. Under the new system the operations of contractors and recruiters continue, and the recruitment is no more spontaneous than it was under the old system: the difference is that these operations are now entirely uncontrolled by the careful check of licensing and registering which safeguarded them under the former system, and, in the Lieutenant-Governor's opinion, some change in the law is imperatively demanded, which shall result in some control being put on the recruitment of labourers before they are deported from the Bengal Province.

The Government of India have been addressed on the subject. In the meantime it would be a good thing if the Deputy Commissioner were to devote his serious attention to detecting and punishing the offences he describes.

5. *Manufactures and trade.*—But little new is reported under the head of manufactures and trade. The traffic with Nepal was in a disorganised state owing to the internal disturbances in that country.

6. *Land Revenue, Cess Collections, Excise, Stamps, and Income-tax.*—The Land revenue collections were on the whole satisfactory, amounting to Rs. 33,61,830, or a percentage of 97·12 on the total demand. The cess collections amounted to Rs. 6,30,079, or a percentage of only 85·8 per cent. The total collections of Excise revenue amounted to Rs. 12,11,957, thus showing an increase of more than a lakh of rupees over the previous year's realizations. The Stamp revenue is Rs. 11,00,990, showing an increase of more than half a lakh of rupees. The Income-tax brought in Rs. 2,23,388. Upon the whole the returns of revenue are satisfactory.

7. *Education and employment of Mahomedans.*—The control of middle and primary schools was transferred to District Boards during the year. The number of pupils increased from 80,511 to 89,720. Mahomedan pupils advanced from 18,429 to 19,660. In the two districts of Maldah and Purneah, in which the Mahomedans form a large proportion of the population, the number of Mahomedans employed in Government service is very considerable in the latter district, but less than might have been expected in Maldah. Out of a total number of 1,634 Mahomedans reported to be in superior service in the whole division, no less than 1,420 are in Purneah. It is possible that there is some error in classification: the figures, as given, deserve the attention of the Commissioner.

8. *Local bodies and Municipalities.*—The information given on the subject of Local and District Boards is insufficient. The attendance is said to have been generally satisfactory, although in the Bhagulpore district interest seems to have waned. No account is given of the work done by the Boards. The Municipalities in the Division appear to have done some good work, but there is room for much improvement, especially in regard to sanitation.

9. *Conduct of Zemindars.*—The conduct of zemindars in the Division generally is favourably reported on.

## Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government, during the week ending the 21st July 1888.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
<b>BENGAL.</b>			
<i>Western Districts.</i>			
BURDWAN DIV.	1 Burdwan July 21, '88	1.28	Weather—seasonable. State and prospects of crops good in the west, fair in the centre, and poor in the east and north east, where the continued want of rain is causing anxiety, and artificial irrigation is being resorted to. Prices slowly rising.
	Chuna ...	0.88	
	Cutwa ...	0.18	
	2 Bankoora „ 21, '88	3.92	Weather—seasonable. Rainfall sufficient in the Sudder sub-division. The progress of rice cultivation is reported to be retarded by insufficient rain in the Bishnupore sub-division. Sugarcane and indigo are thriving. Comm. rice is selling at the Bankoora mart at 19 seers per rupee.
	3 Birbhum „ 21, '88	1.90	Weather—cloudy and showery since 19th instant. Reports from the district express great anxiety on account of want of rain, but since they were despatched there has been general heavy rain. Transplantation has begun.
	Rampur Haut ...	0.57	
	4 Midnapur „ 21, '88	4.13	Weather—close, with heavy storms the last three evenings at head-quarters. Ordinary cultivation going on. In Cutai sowing has commenced, and there have been slight showers almost everywhere. Tamluk has had a good fall of rain (2.30) during the past week.
	5 Hugli „ 21, '88	1.53	Weather—seasonable, but drier than usual. More rain is wanted for transplanting rice on high lands; otherwise prospects are now favourable, as the rainfall, though light, has been so far well distributed.
	Serampur ...	1.82	
	Jehanabad ...	1.13	
	Howrah July 23, '88	2.99	Weather—seasonable. State and prospects of crops fair. More rain wanted.
<i>Central Districts.</i>			
PRESIDENCY DIV.	6 24-Pergha. July 24, '88	2.15	Weather—seasonable, but the rainfall is still insufficient. More rain wanted. Transplantation going on.
	7 Nuddea „ 21, '88	0.60	Weather—hot. Rain deficient. More rain is generally wanted for the <i>aus</i> crop and for transplantation of the <i>aman</i> crop. Jute and sugarcane fair. Indigo not very good.
	Kushien ...	0.41	
	Melurpur ...	1.09	
	Chooadanga ...	0.17	Slight showers during the early part and heavy showers during the latter part of the week. Prospects of <i>aus</i> good. Cultivation for Sunderbund <i>aman</i> going on. <i>Amun</i> in the north thriving. More rain wanted in the Sudder sub-division for <i>aus</i> . Sugarcane and jute promise well.

CALCUTTA, the 24th July 1888.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS  
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS  
TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 20<sup>TH</sup> OF  
JULY 1888.**

At the close of the previous week a small cyclonic storm which had formed in the northern half of the Bay, and which had existed off the South Orissa coast for two or three days, was passing inland, and was advancing in a west-north-westerly direction towards the eastern districts of the Central Provinces and into the south of Chutia Nagpur. The centre of the small storm had crossed the coast on the afternoon of the 13th, and by the morning of the 14th the centre was apparently well to the west of Cuttack. During the following 24 hours the depression advanced rapidly into Bundelkund, and was much more feeble, and on this day the cyclonic circulation of winds had become decidedly irregular. With the advance of the storm inland a strong monsoon current set in over the coasts of Bengal and Orissa, and good general rain was received, the rainfall being decidedly heavy in many instances.

On the 15th a steady south-easterly and easterly monsoon current was reported over the whole province, but on the 16th the westerly winds blowing across Central India decidedly increased in force, and westerly and south-westerly winds partly drove back the south-easterly current previously obtaining, causing a considerable amount of interaction in the west of the province, and in addition a slight circulation of winds was set up over Central Behar, which gave rise to general heavy rainfall in all the western districts. On the 17th conditions were unchanged, but on the 18th they became distinctly disturbed over the west of the province, and a feeble low-pressure area was developed which stretched from the north-west angle of the Bay through West Bengal into Chutia Nagpur and Behar. To the west of this area northerly winds obtained, and to the east southerly and south-easterly winds, showing a distinct tendency to cyclonic circulation. These conditions still further developed during this day, and on the morning of the 19th a distinct barometric depression had formed over part of South-West Bengal and the head of the Bay, the centre of the depression being close to the Sunderbuns and to the south-east of Saugor Island. The small storm was accompanied by a very distinct cyclonic circulation of winds, but the wind force was not large at the coast stations, though probably over the greater part of the northern half of the Bay squally weather and strong winds obtained. During the afternoon of the 18th the small storm advanced over the land in a north-westerly direction, the centre passing close to Saugor Island between 2 and 4 p.m., and on the morning of the 19th the centre was near Midnapore and slightly to the west of it. With the inland advance of the storm, winds strengthened largely at the head of the Bay, and a particularly strong monsoon current commenced to blow at the coast stations, bringing up decidedly heavy rain to the south-western and western districts.

The general meteorological conditions over the province during the week have therefore been favourable for general rainfall, particularly in the western and south-western districts, though not to the same extent in the eastern and south-eastern districts; and, generally speaking, the following districts have received heavy general rain, viz., Chutia Nagpur, Orissa, Behar, and North Bengal, while rainfall, though general, has not been very heavy in East and parts of South-West Bengal.

*Pressure.*—The changes of pressure during the week have not been of much importance except in those cases where they have been brought about by the two barometric depressions alluded to previously. Pressure has generally been below the normal for the period, the defects being largest in the south-western districts, where Calcutta and Burdwan show a defect of 0.046 inch, and False Point one of 0.043 inch. On the other hand, the defects in the south-east and north of the province only amount to a few thousandths of an inch. Generally over the whole province of Bengal pressure has been below the normal by 0.022 inch. In Assam the mean pressure has been in excess of the normal by 0.007 inch.

*Temperature.*—Owing to the general and heavy rainfall over the greater part of the province the mean temperature has generally been below the normal. In East and South-West Bengal, where the falls have not been so heavy as in other districts, temperature has been in excess of the normal by about 1°, but in North Bengal, North and South Behar and Chutia Nagpur, temperature has been in defect by amounts varying up to 1°, and in Orissa temperature has been exactly normal. Over the whole province, therefore, the general temperature has almost equalled the normal. In Assam temperature has been in defect by 0.6°.

*Rainfall.*—The heaviest falls have occurred in Chutia Nagpur, the stations in which have averaged 5.15 inches during the week. In Orissa an average fall of 4.10 inches is reported, while in North Bengal and North and South Behar the falls have averaged between three and four inches, and in South-West and East Bengal the falls have averaged between one and two inches. In the last two districts the falls have been in defect by more than fifty per cent. of the normal, but in all other districts very considerable excess falls are registered.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the week ending Friday, the 20th of July 1888 :—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph. The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

## MEMORANDUM.

DURING the week ending 7th July 1888, births and deaths were registered in the principal Municipalities in Bengal at the rates, respectively, of 18·2 and 19·9 per 1,000 of population, against 17·6 and 24·2 per 1,000, respectively, during the preceding week ending 30th June, indicating a large decrease in the registration of deaths.

2. The following Municipalities returned the highest proportions of births and deaths :—

<i>Births.</i>			<i>Deaths.</i>		
		Ratio per mille.			Ratio per mille.
Monghyr	...	46·1	Serampore	...	33·4
Gya	...	30·1	Burdwan	...	27·5
Midnapore	...	29·4	Gya	...	27·3

3. From the figures in the following table, it appears that during the week under notice the mortality from fever and the maladies recorded under the head of "Other causes" had diminished noticeably, and that the casualties from the rest of the death-causes exhibit only very small differences :—

	Ratio per mille during the weeks ending—	
	7th July 1888.	30th June 1888.
Cholera	2·7	2·9
Small-pox	·1	·2
Fever	7·4	9·5
Bowel-complaints	1·9	2·4
Injury	1·0	·4
Other causes	6·8	8·8

4. The suffering from cholera, injury and "Other causes" was greatest in the under-mentioned Municipalities, the other diseases exhibiting no special local severity :—

## INCREASE.

Tons.

Cotton piece-goods—

(1) European .. .. . This increase is due to steamers not running this year between Calcutta and Jeaganj.

16

Grains—

(5) Others .. .. .

This increase is due to greater export of Kulai, masuri, &c., to foreign Railways for low price at the local market.

15

Metals—

(4) Others .. .. .

This increase is due to greater import of brass and bell-metal wares from foreign Railways for high price in the local market.

12

Provisions—

(3) Others .. .. .

This increase is due to export of mangoes for low price in the local market.

22

Railway plant and rolling-stock .. .. .

42

This increase is due to greater materials carried during this month.

Salt .. .. .

38

This increase is due to there being unsufficient water in the river for boats.

Oilseeds—

(1) Linseed .. .. .

25

(2) Mustard and rape .. .. .

37

The increase on these staples is due to greater import from foreign Railways for high price in the local market.

Stone and lime .. .. .

11

This increase is due to greater imports this year for building purposes.

Sugar—

(1) Drained .. .. .

25

This increase is due to fair demands in the local market.

Timber .. .. .

12

There was no such traffic last year.

## DECREASE.

Coal .. .. .

This decrease is due to previous stock not being exhausted.

165

Cotton, raw .. .. .
